

Filter VND 2 to 5-Stop PGYTECH for Osmo Pocket 3

Filter VND 2 to 5-Stop PGYTECH for Osmo Pocket 3

Ref: 6976100485143

PGYTECH VND 2-5 Stop Filter for Osmo Pocket 3

The PGYTECH VND 2-5 Stop Filter for Osmo Pocket 3 is an adjustable ND filter that allows you to achieve ND4, ND8, ND16, and ND32 filtering effects by rotating it. This effectively combines four filters into one, reducing the amount of incoming light and enabling you to choose the appropriate exposure value. It's the perfect tool for any creative filmmaker looking to achieve fantastic results regardless of lighting conditions.

High-Quality Construction

The lenses are made from Japanese AGC optical glass, which has undergone high-resolution processing and is coated with a multi-layer nano coating, making them resistant to water, oil, dirt, and scratches. The filter is exceptionally lightweight and does not adversely affect the gimbal's calibration. Furthermore, its magnetic design makes installation incredibly simple and fast.

Included in the package:

- Filter
- Cleaning cloth

Manufacturer
PGYTECH

Model
P-47B-012

Compatibility
DJI Osmo Pocket 3

Material
Aluminum + optical glass

Weight
1.67 g
