PGYTECH Protective Bag Size S (Geometric Pattern)

The PGYTECH Protective Bag is the perfect solution for those who value the safety and functionality of their accessories. Made from innovative polymer material, it provides durability and reliability. The P-CB-141 model, featuring a geometric pattern and RoHS certification, offers versatile applications, from protecting photographic equipment to everyday gadgets. Its lightweight construction (61g) and compact dimensions (350 x 350mm) make it the ideal companion for everyday use.

Durable Polymer Material

The main advantage of the PGYTECH bag is its high-quality polymer material construction. This makes it resistant to wear and maintains its original appearance for a long time. This material, processed using nanotechnology, also provides high bonding strength, ensuring that the bag retains its properties even after multiple washes.

Universal Application

The PGYTECH bag easily accommodates various items, from cameras and lenses to small tripods, filters, and even iPads. Its versatility makes it an ideal solution for both photography professionals and enthusiasts, as well as individuals seeking a practical accessory for storing everyday items.

Protection Against Scratches and Impact

The ripstop material used to make the bag provides effective protection against scratches and impacts. This feature is particularly important for those who want to safeguard their valuable electronic devices.

Easy Maintenance

Although the bag is not waterproof, it is easy to maintain and does not require special care. Hand washing with a gentle detergent at temperatures not exceeding 40 °C is recommended. Natural drying ensures that the bag retains its protective properties and aesthetic appearance.
