PGYTECH Propeller Guard for Mavic 3 Classic

Discover uncompromised protection for your Mavic 3 Classic drone with PGYTECH propeller guards. Designed with safety and convenience in mind, these guards not only effectively shield the propellers from damage but also provide protection to objects in the immediate vicinity. Their intuitive design makes installation and transportation easy, while the high-quality PPO material ensures long-lasting durability. Explore the key benefits that make these guards an essential addition to your drone kit.

Propeller Protection

PGYTECH propeller guards are indispensable in protecting the propellers of your Mavic 3 Classic. They minimize the risk of damage both during flight and unexpected collisions. This protection is crucial for both experienced drone operators and beginners, increasing the lifespan of your equipment.

Environmental Safety

In addition to propeller protection, these guards ensure safety for people, animals, and objects near the drone. This is an invaluable feature, especially in crowded or unpredictable environments where the risk of accidental contact with the propellers is higher.

Easy Installation

The unique design of PGYTECH propeller guards, consisting of two sections with fasteners, makes installation quick and straightforward. This is the perfect solution for those who value time savings and want to avoid complicated installation procedures.

Convenient Transportation

Thanks to the well-thought-out design of the guards, transporting them is incredibly convenient. You can easily disassemble and take them with you anywhere, which is especially important for users who frequently travel with their drone.

Durable and Resilient Material

Made from high-quality PPO material, PGYTECH propeller guards are characterized by high durability and resistance to damage. This is an investment that will provide long-lasting protection for your equipment.
