

Blind tilt Motor SwitchBot Blind Tilt

Blind tilt Motor SwitchBot Blind Tilt

Ref: 850046603280

SwitchBot Blind Tilt System

The SwitchBot Blind Tilt is an innovative blinds management system known for its easy installation without the need for tools. Intelligent light regulation based on external conditions allows for maintaining optimal lighting comfort in every room, while its compatibility with other SwitchBot products simplifies creating a smart home. Additionally, versatile control options ensure user convenience. The included solar panel ensures long-lasting operation without the need for recharging.

Convenience with the App

The dedicated mobile app provides easy and intuitive control of blind positions from your home. From the app, you can also customize settings, such as scheduling blinds to open at a specific time, like in the morning when you wake up. You can also manually manage the blinds, and Blind Tilt will automatically synchronize the settings. With Bluetooth 5.0 support, you'll always enjoy a stable connection.

Additional Control Options

When connected to the SwitchBot Hub Mini, you gain additional control options, including remote control from anywhere and compatibility with voice assistants. The system is compatible with Alexa, Google Assistant, Siri Shortcuts, IFTTT, and SmartThings. You can also equip yourself with the SwitchBot Remote to control blinds with a simple click. The choice is yours!

Blind Grouping

Don't waste valuable time individually controlling blinds in each room. With the SwitchBot Blind Tilt, you can configure up to 4 blinds into groups and control them simultaneously with a single command. It is also possible to create multiple groups. This allows you to conveniently manage your smart home! Note: SwitchBot Hub is required for groups consisting of more than 4 blinds.

Well-Thought-Out Design

The SwitchBot Blind Tilt system is equipped with a motor that allows precise adjustment of blinds with an accuracy of up to 2°, providing better control over natural light in rooms. Additionally, the noise generated during operation does not exceed 40 dB, ensuring it does not disrupt your peace and quiet. The product is also widely compatible - you can successfully use it with blinds up to 3 meters wide.

Intelligent Automation

Thanks to the built-in light sensor, the SwitchBot Blind Tilt allows you to maintain a constant brightness level in the room by automatically adjusting the blind angle based on external light intensity. When natural lighting isn't sufficient, you can equip yourself with the SwitchBot Color Bulb, which works in harmony with the system, ensuring a smooth maintenance of the optimal lighting environment in your home.

Reliable Power Source

The included solar panel is equipped with a 2000 mAh battery, ensuring continuous power supply to the system, eliminating the need for regular recharging. This is an environmentally friendly solution that also saves energy.

Included in the Package:

- Main Unit
- Solar Panel
- Open Flex Connector
- Base A
- Base B
- Base Cover
- Cable Holder
- Adhesive Adapter (S/M/L/XL) x4
- Paper Measuring Tape
- Mounting Card
- Self-Adhesive Stickers x2
- Wet Wipes
- USB-C Power Cable
- Retractable Pin
- Spare Double-Sided Tape (for Base A)
- User Manual
- Manufacturer
- SwitchBot
- Model
- W2701600
- Color
- White
- Material
- ABS+PC (UV-resistant coating)
- Dimensions
- 48.8 x 29.2 x 210 mm
- Weight

- 30 g
- Power Source
- USB-C, DC 5 V 1 A; 2000 mAh lithium battery
- Battery Life
- Approximately 10 months or nearly unlimited with solar panel
- Operating Temperature
- From -10°C to 45°C
- Operating Humidity
- From 10% to 95% RH
- Torque Force
- ≤ 1 kgf.cm
- Network Connectivity
- Bluetooth 5.0
- System Requirements
- iOS 11.0+, Android OS 5.0+
