

SwitchBot Outdoor Spotlight Cam

SwitchBot Outdoor Spotlight Cam

Ref: 850043739319

SwitchBot Outdoor Spotlight Cam wi-fi outdoor camera

The SwitchBot Outdoor Spotlight Cam is a smart solution that allows you to monitor the environment around your home conveniently and reliably. Equipped with numerous features and providing high quality images, it is ideal for securing your property.

High image quality

The camera offers 1080P HD video resolution, which means that every detail will be visible on the recorded footage. Whether you're monitoring your front door or backyard, you can count on crisp and clear recordings, in which everything that happens around your home will be clear and legible.

Wide field of view

A wide field of view of 110° horizontally is a big advantage of the SwitchBot Outdoor Spotlight Cam Wi-Fi camera, which allows you to record a much larger area than standard surveillance cameras. This makes it easy for you to monitor your home's surroundings without investing in multiple cameras or complicated surveillance systems.

Night visibility

Even after dark, the camera provides visibility of up to 7.5 meters. This is perfect for those who want a complete view of what's

happening on the property at any time of the day or night. When the camera detects movement after dark, it activates a light, so no intruder goes unnoticed.

Intelligent motion detector

The camera is equipped with a PIR sensor with a range of 7.5 meters and a detection angle of 110°. This means that any movement of a person or animal within the camera's range will be recorded, further enhancing the feeling of security and eliminating the risk of false alarms related to object movement.

Real-time notifications

Now you'll be up to date with everything that's happening around your home. A dedicated app sends real-time notifications to your phone, so that when motion is detected within the camera's range, you will be notified immediately. In addition, the app supports alarms that reach up to 100 dB in an emergency, allowing you to respond as quickly as possible.

Voice capability

The device supports Google's voice assistant and Amazon Alexa, giving you even more convenient insight into what's happening within camera range. Are the kids playing in the garden while you're cooking dinner? All it takes is a short command to make sure they're safe.

Two-way communication

The camera is equipped with a speaker and microphone, so it supports two-way communication. You can easily call the kids for lunch or talk to the courier without having to open the door when you can't approach. It's also an added security feature that will allow you to easily scare away a possible intruder.

Recording on a microSD card

You can record video footage and store it on a microSD card with a capacity of up to 256 GB, formatted in FAT32. This is a flexible solution that allows you to keep the recordings for a longer period of time to serve as a souvenir or evidence recording in case of unwanted events.

Weatherproof

The camera features an IP55 rating, which means it is resistant to moisture and dust. It operates in a temperature range of -20°C to 50°C, making it suitable for use in a variety of weather conditions, giving you peace of mind and security all year round.

Easy assembly and hassle-free installation

Preparing the camera for operation will not be difficult for you. You'll find a wall-mount bracket included, with which you can install it anywhere. The device is compatible with Wi-Fi and Bluetooth Low Energy 4.2, allowing it to easily connect to your mobile devices, giving you instant access to the camera's video.

Flexible power supply

The camera is powered by a built-in 10000 mAh battery for continuous operation. In addition, a solar panel is available for sale separately, which allows solar charging. This is an environmentally friendly solution that allows you to save electricity, giving you peace of mind that the camera won't let you down at crucial moments.

Included

- Outdoor camera
- Base
- Mounting screws
- Wall mounting bracket
- Sticker
- USB-C cable 1m

- Manufacturer
- SwitchBot
- Model
- W2802000
- Color
- white
- Material
- ABS with UV-resistant coating
- Size
- 86 × 86 × 83 mm
- Weight
- 320 g
- Power supply
- 5 V 2 A
- Operating temperature
- -20°C to 50°C
- Video resolution
- 1080P HD
- Field of view
- 110° horizontally
- Storage
- Supports FAT32-formatted microSD cards up to 256GB
- Night visibility
- 7.5 m (24.6 ft)
- Operating humidity
- ≤ 95% RH
- Network connectivity
- 802.11 b/g/n, 2.4 GHz; Bluetooth Low Energy 4.2
- Battery capacity
- 10000 mAh
- PIR detection distance
- 7,5 m
- PIR detection angle
- 110°
- Weather resistance
- IP55
