SwitchBot Mini Robot Vacuum K10+

Ref: 850043739425

SwitchBot Mini Robot Vacuum Cleaner K10+.

Discover a new era of cleaning with SwitchBot! The SwitchBot Mini Robot Vacuum K10+ cleaning robot is the perfect combination of innovative technology and the performance you need to keep your home in perfect order. It not only vacuums, but also mops your floors, leaving them perfectly clean and fresh. Intelligent navigation, long run time and extremely quiet operation are just some of its advantages, all in an extremely compact design.

Maximum performance in a compact form

The Mini Robot Vacuum K10+ offers an impressive 2,500 Pa of suction power to keep your floors spotlessly clean - it can easily handle dust, dander or crumbs! It intelligently recognizes carpets and automatically increases suction power to deal with dirt even more effectively. What's more, thanks to the 4-level suction power adjustment, you'll adjust the robot's performance to almost any type of surface, and its compact design allows it to reach all nooks and crannies, thoroughly cleaning every inch of the surface.

Even more time to clean

A fully charged cleaning robot provides up to 120 minutes of operation, so it can thoroughly clean an area of up to 120 m²! This means that the K10+ robot is great for both smaller apartments and larger apartments. You also don't have to remember to charge it. If the charge level is too low, the robot will automatically stop cleaning to renew energy, and then return to where it left off to continue

cleaning.

Intelligent navigation system

The SwitchBot cleaning robot will find its way around your home perfectly - all thanks to the LDS intelligent navigation system. It precisely scans its surroundings, creating an accurate map of your home that allows it to plan the most effective cleaning route. It also intelligently identifies obstacles and avoids them, and its ability to negotiate obstacles up to 2 cm high makes it effortlessly handle thresholds or carpets in its path. Even dark rooms are no problem for it!

No contact with dirt

Let the robot do the work for you, giving you more time for the things you really enjoy doing. Mini Robot Vacuum K10+ automatically returns to its base, where it empties the dirt tank on its own. The station offers a capacity of as much as 4 liters, which translates to up to 70 days without emptying.

Control it from a distance

Controlling the cleaning robot is easier than you think! A dedicated app will allow you not only to turn the device on and off remotely, but also to plan cleaning schedules and even monitor its progress. With it, you can create virtual walls and forbidden zones, which will allow you to control where the robot can and cannot go. The K10+ is also compatible with popular voice assistants (Google Assistant, Amazon Alexa, Siri and IFTTT). Now you can control it with simple voice commands without reaching for your smartphone!

Clean in silence

Forget about annoying noise! With its innovative noise reduction system, the volume of the SwitchBot cleaning robot does not exceed 45 dB. This allows the Mini Robot Vacuum K10+ to work at any time of the day or night! Now you can enjoy pristine cleanliness without disturbing the peace and quiet of other household members.
