LaserPecker 3 Basic Version

The LaserPecker 3 Basic Version is a device that revolutionizes the world of engraving, combining advanced technology with practical functionality. With this device, users can easily engrave their own photos, graphics, signatures, or codes, using high-quality resolution and an intuitive application. Perfect for professionals and hobbyists alike, the LaserPecker 3 is one of the most versatile engraving tools available on the market.

Intuitive App and Wide Compatibility

The LaserPecker app is available on Huawei App Gallery, Google Play Store, and Apple App Store, allowing easy engraving of images directly from your phone. With compatibility for iOS, Android, MacOS, and Windows, everyone can use their favorite device to create unique projects.

Support for Various File Formats

The LaserPecker 3 Basic Version exhibits impressive versatility, supporting various file formats, including BMP, JPG, PNG, SVG, and G-code. Whether it's complex graphic designs, simple photos, or specialized CAD projects, the LaserPecker 3 adapts to the needs of any task. The ability to work with such diverse file formats makes this device highly attractive to a wide range of users, from amateurs to professional designers.

Exceptional Engraving Resolution

The LaserPecker 3 offers three supported resolutions: 1k, 2k, and 4k, allowing users to choose the level of engraving detail. This feature makes the device ideal for both precise artistic work and less detailed projects.

Precise Engraving Positioning

The device displays a red square, allowing for precise determination of the engraving location and size, which is crucial for maintaining accuracy and the aesthetics of the final product.

Adjustable Fixing Stand

The fixing stand provides stability during engraving, enabling high-quality results. Engraving proceeds quickly and efficiently, increasing work efficiency.
