

Air conditioning/heat pump smart controller Sensibo Air

Ref: 7290016037173

Air conditioning/heat pump smart controller Sensibo Air

Intelligent Sensibo Air Air Conditioning/Heat Pump Controller

Sensibo Air is a controller for users who value advanced functionality. This sleek controller connects to Wi-Fi, offering not only full control over your air conditioning from anywhere but also energy savings, customization to user needs, and integration with popular voice assistants. Sensibo offers features such as integration with Apple HomeKit, advanced chipset, WiFi, and Bluetooth Low Energy support. Its compact size allows for easy placement in any room, and intelligent algorithms ensure up to 40% savings on heating bills.

Integration with Apple HomeKit

Sensibo Air stands out with seamless integration with Apple HomeKit, allowing easy management of Apple devices. This enables users to control the temperature in their homes using an intuitive interface and Siri voice commands, enhancing user comfort and home climate management efficiency.

Integration with Sensibo Room Sensor

Sensibo Room Sensor continuously measures temperature and humidity in the home and, in conjunction with Sensibo Air, can automatically activate air conditioning when someone enters the room and turn it off when they leave.

Schedules and Automation

Creating personalized schedules for different days of the week and times of the day allows for even greater control over the home climate. This enables users to adjust the air conditioning to their daily schedule, maximizing energy efficiency and comfort.

Geofencing

The geofencing feature automatically adjusts the temperature based on the user's location. When the user approaches their home, the system automatically activates the air conditioning, providing ideal conditions upon their arrival. This intelligent solution combines convenience with energy savings.

Filter Cleaning Reminders

Sensibo Air reminds users to clean the filters in their air conditioner, which is crucial for maintaining device efficiency and indoor air quality. Regular filter cleaning ensures longer device lifespan and better indoor conditions.

Powerful Features

Sensibo Air offers features such as daily temperature and humidity charts and logs, which assist in precise settings adjustments. The Pure Boost mode allows for quickly reaching the desired temperature, particularly useful in extreme weather conditions. Compatibility with major voice assistants such as Google Home, Amazon Alexa, and Apple Siri provides even greater flexibility in managing the home climate.

Timer Function

The timer function allows for programming the air conditioning or heat pump to automatically turn off at a specified time. This feature helps users save energy by avoiding unnecessary device operation during hours when it is not needed while ensuring comfortable conditions at home.
