3D VR glasses for 3,5-6 inch smartphones Esperanza EMV300

3D VR glasses for smartphones 3.5-6 inches Esperanza EMV300

Esperanza EMV300 are revolutionary 3D VR glasses that take the virtual reality experience to a whole new level. With them you can enjoy 3D movies and VR games directly on your smartphone. Compatible with devices from 3.5 to 6 inches, both Android and iOS, the Esperanza EMV300 goggles offer incredible comfort and image quality. Equipped with aspherical lenses for naturalness and depth of image, adjustable straps, a sliding cover for AR gaming, and vents, these goggles are a real treat for any VR enthusiast.

Naturalness and depth of image: aspherical lenses

The Esperanza EMV300 uses 40mm aspherical lenses, providing sharp and clear images without distortion. This makes the virtual reality experience more realistic and immersive. The bi-directional lens adjustment (up to 10mm distance and 55-72mm spacing) allows customization for maximum comfort and image quality.

Comfort and fit: elastic straps and protective overlay

The EMV300 goggle is designed with comfort in mind. The elastic straps ensure that the goggles stay securely and stably on the head, while the protective overlay made of high-quality artificial leather and flexible sponge perfectly adapts to the shape of the face. In addition, thanks to this design, the VR glasses can be used without removing the corrective glasses.

Practicality: vents and sliding cover

The Esperanza EMV300 also takes care of the user's comfort from a practical angle. The vents prevent the lenses from evaporating, and the sliding cover allows easy use of the phone's camera in AR (Augmented Reality) games. Cutouts on the sides of the goggles allow easy connection of headphones and a smartphone charging cable for uninterrupted entertainment.

Versatility: compatibility with Android and iOS

Okulary Esperanza EMV300 są kompatybilne z szerokim zakresem smartfonów, obsługując zarówno system Android, jak i iOS. Dzięki temu są idealnym rozwiązaniem dla każdego, niezależnie od typu posiadanego urządzenia. Bez względu na to, czy masz iPhone'a czy smartfon z Androidem, możesz cieszyć się wirtualną rzeczywistością na najwyższym poziomie.

Prepared for entertainment: perfect for VR games and 3D movies

The Esperanza EMV300 is not only about technology, but also about unlimited fun. Download VR games and movies from the APP Store or Google Play Store and enjoy an unparalleled virtual reality experience. Sturdy construction, easy smartphone mounting, and the ability to use the gyroscope function of modern smartphones, make these VR goggles ideal for any game and movie lover 3
