Portable 3-in-1 Flextail Tiny Pump (White)

The Flextail Tiny Pump 3-in-1 is a unique solution for those who value mobility and versatility. Its wireless design, compact dimensions, and lightweight build make it the perfect choice for travelers, camping enthusiasts, and anyone who values convenience in any situation. The Flextail Tiny Pump is more than just a pump; it's a tool that simplifies life in many situations.

Lightweight and Comfort

The Flextail Tiny Pump weighs only about 45 grams, making it one of the lightest pumps on the market. This small weight, combined with compact dimensions (approximately 6 x 4 cm), ensures unparalleled transport comfort. You can easily attach it to your backpack without worrying about additional weight.

Universal Nozzles

A set of five different nozzles included with the Flextail Tiny Pump makes this device exceptionally versatile. It allows for easy inflation of sleeping mats, swimming pool floats, inflatable mattresses, and vacuum bags. Its universality makes it the perfect companion both on vacation and at home.

Intelligent Charging Indicator

The practical LED indicator is another advantage of the Flextail Tiny Pump. It informs you about the device's charging status: red light indicates incomplete charging (0-99%), while green indicates a full charge (100%). This way, the user always knows when the pump is ready for use.

Inflation and Deflation Functionality

The Flextail Tiny Pump is not limited to inflation only. Its ability to deflate air is equally effective, making it much easier to remove air from items such as mattresses or vacuum bags. This bidirectionality makes it extremely useful in various situations.

Portable and User-Friendly

The wireless design of the Flextail Tiny Pump and its lightweight make it incredibly user-friendly. No need to connect to a power source, and its easy portability (thanks to the practical handle) make it the perfect tool for travel. Simply charge it via a Type C interface, and it's ready to go in any conditions.
