

Portable Flextail Max Vacuum Pump

Portable Flextail Max Vacuum Pump

Ref: 6971670132411

Flextail Max Vacuum Pump - Portable Vacuum Pump

The Flextail Max Vacuum Pump is a highly efficient, compact device, perfect for outdoor enthusiasts and travelers. With its fast pumping, efficient battery, and ease of use, it is an essential piece of equipment for any expedition. The Flextail Max Vacuum Pump combines functionality, portability, and durability, making life in the field easier.

Quick Inflation

The Flextail Max Vacuum Pump is characterized by exceptional performance. It can inflate a double mattress in just 2 minutes and a single one in only a minute. This is the ideal solution for those who value time and comfort when setting up their sleeping space while camping or on a picnic.

Charge Indicator

The charge indicator is another practical feature of the Flextail Pump. The red light informs the user when the device needs to be charged, preventing unexpected interruptions in power supply. This ensures that your pump is always ready to operate when you need it.

USB-C Charging Port

The modern USB-C charging port is a significant advantage of the Flextail Max Vacuum Pump. It allows for quick and convenient charging using widely available power sources. This is especially important during travel when access to electricity is often limited.

Lock Switch

The lock switch is a feature that protects the device from accidental activation. This is particularly important during transportation when improper pump activation could lead to damage or unnecessary energy consumption.
