Ref: 6976337900655

Headlight Warsun 1804, 180/200lm, 1x18650 M-USB

Headlight Warsun 1804, 180/200lm, 1x18650 M-USB

The sturdy and durable Warsun 1804 headlamp will keep up with your every expedition! Made of ABS and PVC, it is resistant to drops from up to 2 meters, and is IP44 waterproof and dustproof. It provides two light sources with 180 and 200 lm brightness and 3 light modes to suit different situations. It can operate for up to 10 hours, making it a reliable light source for any occasion.

One flashlight, two light sources

The 1804 uses two types of LEDs - COB and XPE. This makes it even more efficient and long-lasting. COB LEDs provide a powerful and more uniform light beam of 200 lm, while XPE is a diffused light of 180 lm, which will not glare into the eyes of the person standing in front of you. To activate the selected mode, just use the double button located on the top of the flashlight.

High durability

The Warsun 1804 flashlight was built with durability in mind. It was created from ABS and PVC materials and is resistant to drops from a height of 2 meters. It is also IP44 waterproof and dustproof, proving its reliability in all conditions. No matter the weather or terrain, the Warsun 1804 flashlight is the perfect companion for your adventures.

Long-lasting operation and fast charging

The device uses an 18650 battery with a capacity of 2200 mAh and provides 5-10 hours of uninterrupted operation (depending on the mode selected), allowing you to use the light in the field for long periods of time. The USB-C port allows for fast and convenient charging in just 3 hours.

Practical design

The Warsun 1804 flashlight has the advantage of being compact in size (36 x 48 x 84 mm) and light in weight (77 g), which makes it comfortable to carry. You can carry it for long periods of time without feeling uncomfortable, making it ready to use at any time. The built-in USB-C port provides easy access to charging.

Included

Flashlight

Micro-USB cable
