Headlight Warsun 074, 500mAh, M-USB

Ref: 6976337900662

Warsun 074 headlamp flashlight, 500mAh, M-USB

The Warsun 074 flashlight is a device worth having on hand. Thanks to its sturdy, yet lightweight design, it is perfect for harsh conditions. Equipped with 2 light sources, it offers 5 light modes with 180 lm and 50 lm brightness. The flashlight has a motion sensor and provides an operating time of 5 to 10 hours, depending on the selected mode. You will refill its energy in 3 hours using the cable you will find in the kit.

Reliable light source

Two light sources will provide you with the kind of illumination you currently need. The 074 uses XPE LEDs in the main lamp. It provides a uniform and powerful beam of light with a brightness of 180 lm. It supports 3 intensity modes that you can easily adjust to the situation. The second lamp composed of COB LEDs provides yellow light with a brightness of 50 lm. It will work great, for example, during fog, providing better visibility. It is also more comfortable for your eyes.

Motion sensor and adjustability

The flashlight is equipped with a motion sensor, so you can turn on the light with a simple gesture. This is a practical solution with which you gain time, for example, in emergency situations. What's more, the 074 offers 90° adjustability, so you can easily direct the light where you need it. It's also a practical solution so you won't blind your interlocutor.

Resistant to harsh conditions

If you need a reliable flashlight in the field, the Warsun 074 won't let you down. Made of durable ABS and PVC, it demonstrates resistance to impacts and falls from a height of 3 meters. It's also IPX6 waterproof, so splashing or momentary immersion in water won't hurt it. Despite its sturdy construction, the flashlight is lightweight and compact, so carrying it for long periods of time does not cause discomfort.

Long runtime and easy charging

The device uses a polymer-lithium battery with a capacity of 500 mAh. As a result, it provides 5-10 hours of operation, depending on the mode you choose. You can refill its energy in as little as 3 hours using the Micro-USB cable (included).

Included

Flashlight

Micro-USB cable

☐Manufacturer

☐Warsun

☐Model

☐074

☐Material

☐ABS + PVC

☐Light source

☐1 x XPE + 1 x yellow COB mode

☐Brightness

☐180 lm + 50 lm

☐Modes

☐Strong/Medium/Faint/Yellow/Induction

☐Battery

☐Polymer-lithium 500 mAh

☐Operating time

☐5-10 h

☐Charging time

☐3 hours

☐Drop resistance

☐3 m

☐Waterproof

☐IPX6

☐Dimensions

☐30 x 38 x 58 mm

☐Weight

☐47 g

☐Additional features

☐Dual light source, angle adjustment, motion sensor, Micro-USB charging port
