Headlight Warsun WD09D, 200lm, 1x18650 USB-C

Ref: 6976337900679

Warsun WD09D headlamp flashlight, 200lm, 1x18650 USB-C

Warsun WD09D is a multi-tasking headlamp that provides precise illumination where you need it. With three light sources, it provides up to 500 lm of brightness and 5 modes to suit different situations - including emergencies. The ZOOM system will allow you to adjust the light beam to the current conditions, making the flashlight great for map work, for example. Thanks to its durable and lightweight design, using it in the field is comfortable and safe.

Reliable illumination

The flashlight offers 3 light sources and uses advanced LEDs - 1 x T6, 6 x COB and 4 x SMD, so it shines not only strongly, but also efficiently. With five light modes: Strong, Weak, SOS, White Light and Red SOS Light, you can easily adjust the intensity and type of light to suit your current needs. That's versatility for your needs!

Weatherproof

The flashlight's construction is made of aluminum alloy and ABS, which makes it highly durable and resistant to drops from a height of 2 meters. With IPX5 waterproof certification, the flashlight will perform well in harsh weather conditions, offering a reliable source of light when you need it most.

Long-lasting operation and fast charging

Powered by a single 18650 battery with a capacity of 220 mAh, the flashlight guarantees an operating time of 6 to 16 hours, allowing for prolonged use without the need for frequent refills. In addition, thanks to the USB-C port, charging is convenient and takes about 3 hours.

Innovative features

Warsun WD09D offers several features with which you are ready for any situation. A red warning light ensures safety in case of an emergency and will help you call for help. The ZOOM system allows you to fine-tune the width of the light beam. It will come in handy in the field when you need a long-range light or, on the contrary, when you are reading a map after dark and need to precisely illuminate a specific point. The motion sensor allows you to easily operate the flashlight hands-free, which is especially useful during activities in difficult conditions.

Lightweight and compact

Despite its advanced features and rugged design, the Warsun WD09D flashlight impresses with its light weight. It weighs just 77 g and is small (78 x 39 x 49 mm), making it convenient to carry. You will successfully take it wherever you need a bright and reliable light source.

Included

Flashlight

USB-C cable

☐Manufacturer

☐Warsun

☐Model

☐WD09D
