

Robotic Vacuum cleaner Roidmi EVE MAX

Robotic Vacuum cleaner Roidmi EVE MAX

Ref: 6941762400070

Roidmi EVE MAX Cleaning Robot

The Roidmi device is a modern home essential. This vacuum cleaner automatically returns to its base, features a self-emptying tank function, and enables both vacuuming and wet mopping simultaneously. Control it with the dedicated app to take full control of the device, and its long working time ensures up to 250m² of clean surface. Furthermore, compared to the previous EVE Plus version, this model exhibits an 85% higher suction power, a 30% increase in dust collection efficiency, and 60% more cleaning power! All of this, combined with LDS laser technology, makes EVE Max an indispensable assistant for your daily cleaning tasks!

Advanced Navigation System

An advanced navigation system and LDS laser quickly scan your entire home and automatically create a map. If you have a multi-story house, the device will create a separate map for each floor and automatically detect the cleaned area. Additionally, it avoids obstacles thanks to special sensors, and its slim design allows Eve Max to thoroughly clean under furniture.

Potent Suction Power

With increased suction power at 5000 Pa (85% higher than the previous EVE Plus model) and a brushless motor, this duo is unbeatable! The device effectively eliminates dirt even from hard-to-reach places. Moreover, the new integrated roller brush with rubber bristles prevents hair from tangling and can sweep dust and debris from crevices. With Roidmi, your home will shine with cleanliness!

More Than Just Vacuuming

In addition to vacuuming, Roidmi Eve Max is equipped to mop floors. Thanks to the new, movable, and vibrating mop, which was not present in the previous EVE Plus version, you can be sure that your floors will remain impeccably clean! Furthermore, with 3 water dispensing modes, you can adjust the water level to the type of surface you are cleaning. Intelligent solutions allow you to control the amount of water distributed. As a result, you can be confident that the mop attachment is always moist, and you don't have to worry about any leaks. The lowest dispensing level is suitable for tile cleaning, medium for panels, and the highest water level helps maintain the cleanliness of kitchen tiles. The 250 ml water tank is sufficient for cleaning an area of 250 m², making it perfect for cleaning large homes. Additionally, you can reuse the mop attachment multiple times! Just wash it, and it will be ready to use again.

Designed with Your Needs in Mind

Don't worry if your home has carpets. Roidmi Eva Max can lift mop pads up to 7 mm, ensuring that your carpets won't get wet! Furthermore, it cleans 320 times per minute, so no dirt will be a challenge.

Dedicated App

Take advantage of the possibilities offered by the app! With its help, you can manage saved room maps—add names to rooms, divide them, or combine them. Is your child sleeping and you don't want to wake them up? Set up a virtual wall or forbidden zones for Eve Max to exclude that area from cleaning. There is also the option to schedule cleaning schedules for even greater control over the device.

Modern Emptying Station

The Eva Max vacuum cleaner is also equipped with an innovative emptying station. When the dust tank is full, the vacuum cleaner will return to the station and empty it. The robot also has antibacterial ozone technology to eliminate unpleasant odors. The 3-liter tank capacity is sufficient for up to 75 days, so you don't have to worry about frequent tank cleaning. Thanks to this feature, you can go on vacation without worry, and your apartment will clean itself.

Long Working Time

With a 5200mAh battery, Roidmi Eve Max can work for up to 250 minutes. Such a long working time allows for cleaning up to 250 m² of surface on a single charge. Has the device run out of energy? No problem! The vacuum cleaner will find the charging station and, once recharged, return to the place where it left off.

Included in the Package

- EVE MAX Vacuum Cleaner
- Emptying Station
- Dust Bag x5
- Filter x2
- Mop Attachment x2
- Cleaning Brush
- Power Cable
- User Manual

Manufacturer Roidmi
Model EVE MAX
Suction Power 5000 Pa
Recommended Cleaning Area 250 m²
Battery 5200 mAh
Working Time 250 min

Water Tank CapacityApprox. 0.25 l
Waste Tank Capacity (in the robot)Approx. 0.17 l
Waste Tank Capacity (in the emptying station)Approx. 3.0 l
Emptying Station Power850 W
Robot Power65 W
Robot Dimensions355 × 98 mm
Emptying Station Dimensions300 × 358 × 174 mm
Robot WeightApprox. 4.0 kg
Emptying Station WeightApprox. 4.3 kg
