

Universal remote control Imou IR1

Universal remote control Imou IR1

Ref: 6971927234929

Imou IR1 universal remote control

The Imou IR1 universal remote control will help you create a smart home where you live comfortably. With it, you will gain the ability to control selected devices using apps or voice commands. You can also create work schedules for them and automate their operation. The product is compatible with more than 8,000 popular appliances available on the market.

Even more convenient operation

Forget about having to use a number of different remote controls to operate selected devices. With the R1 model you will be able to control them from an intuitive app! You no longer have to worry if you forget to turn off the lights before leaving the house - now you can do it anywhere using your smartphone. You can also share your equipment with the rest of the household, so that they too gain the ability to control it remotely.

Voice control

Don't have a smartphone at hand? No problem - the remote control is compatible with Amazon Alexa and Google Assistant, which means you can control your paired devices with voice commands. Now all it takes is a few simple words to, for example, turn on the lights or turn on the TV!

Wide compatibility

Don't be afraid of compatibility problems. The IR1 remote control can support more than 8,000 devices that use infrared, including many models of TVs, TV boxes, fans, lamps, projectors, speakers and more. It fits about 99% of the equipment available on the market!

Additional features

The app also allows you to create work schedules and timers for connected devices. For example, you can make the air conditioner run from 6:00 to 9:00 on weekdays, and the lights turn on in the evening when you come home from work. It is also possible to configure the remote control panel on a smartphone. There is also an option to automate the operation of selected equipment. For example, you can set the lamp to turn on whenever the motion sensor detects that someone enters the room.
