

Filtry ND (8/16/32/64) DJI Mavic 3 Pro

Filtry ND (8/16/32/64) DJI Mavic 3 Pro

Ref: 6941565957115

ND Filters (8/16/32/64) DJI Mavic 3 Pro

The included ND filters (ND8/16/32/64) were created specifically for the Mavic 3 Pro triple camera. You will successfully use them, for example, when taking long exposure shots or in strong light. They will give you precise control over the shutter speed and allow you to get excellent results even in difficult lighting conditions. However, that's not all. The filters offer less light reduction for the tele camera, so you can avoid having a wide-angle camera and a medium tele camera properly exposed and a tele camera underexposed.

In the box

ND8 filter x1

ND16 filter x1

ND32 filter x1

ND64 filter x1

Brand

DJI

Name

DJI Mavic 3 Pro ND Filters Set (ND8/16/32/64)

Model

CP.MA.00000668.01

Size (light transmission)
