

## Coding Critters Scamper & Sneaker Learning Resources LER 308

Ref: 5906168433016

Coding Critters Scamper & Sneaker Learning Resources LER 3081

Scamper & Sneaker Learning Resources LER 3081 Coding Robot Set (Kitten)

Scamper and Sneaker will introduce your child to the world of screen-free programming. The set teaches the youngest users critical thinking and independent problem-solving. Additionally, it helps to grasp the basics of STEM (science, technology, engineering, and mathematics). Moreover, the included book describes the adventures of Scamper and Sneaker, making programming learning easier.

Coding Learning for the Youngest

Children can create their own sequences using the imprints of cat paws. Additionally, cardboard decorations allow for creating a unique play scenery. Furthermore, with yarn and a slide, the child's room turns into a mini playground. The possibility of creating sequences of up to 30 steps allows for developing imagination and creativity.

Play and Learn in One

Each coding-related challenge in the booklet evolves into a fun Coding Critters set. There is the possibility of programming Scamper to play hide-and-seek, catch butterflies, etc. Besides following coding-related challenges in the booklet, the child can also create their own codes. Coding Critters are also interactive pets — pressing Scamper's nose activates a play mode where the child can feed, pet, and take care of it.
