Speakers 2.0 Edifier R1080BT (white)
Speakers 2.0 Edifier R1080BT (white)

A set for everyone

The Edifier R1080BT compact 2.0 headset is a new, refreshed version of the classic Edifier R1000T4. The sleek MDF wood cabinet minimizes acoustic resonance, while the 4-inch woofers and 3/4-inch silk tweeters deliver deep, rich sound. Practical buttons that allow you to conveniently adjust the volume level are also a plus. The Edifier R1080 Bluetooth also features dual stereo line-in ports with dynamic treble enhancement on port A. But the most important innovation is the ability to sync with Bluetooth devices.

Customize your style

The Edifier R1080BT is available in two color options - black and white. Aside from the visible difference in the color of the cabinet, the white color variant has a striking yellow accent on the bass speaker. Those who prefer to have a speaker system that sounds good while still standing out in the home should opt for the white version.

Good housing

The cabinet is made of medium density fiberboard (MDF). From the front, we can clearly see the 19mm silk dome tweeter and the 4-inch midrange and woofer, and for aesthetic reasons, no fabric cover was used.

Easy control

The power and volume colors are located at the top of the right speaker channel. The power button in the middle also acts as a mode change button. A long press turns the power on/off, while a short press switches between Bluetooth (blue LED) and AUX (green LED) mode. Connectivity options for the R1080BT are rather simple, accepting only a LINE IN or AUX input.
