

Speakers 2.0 Edifier R1600TIII (brown)

Speakers 2.0 Edifier R1600TIII (brown)

Ref: 6923520264032

A set of speakers with a bold design

If you're looking for intense studio-quality sound but don't have room for a multi-piece set, the R1600T III speakers are your best 2.0 set. This compact but powerful pair sounds much better than it looks. Complete with wood accents, the R1600T III will be an attractive and functional addition to your home or office.

Less distortion, more excitement

The R1600T III professional amplifier system is equipped with digital signal processing and dynamic range control to prevent sound distortion, even at the highest volume levels. So you can listen to music loudly while enjoying clear and crisp sound.

Inspirational design, solid sound engineering

The R1600T III produces 60 watts RMS from a 4-inch bass driver and a 19mm tweeter in each speaker. The front-facing bass reflex port emphasizes lower frequencies for richer bass sound. All components are enclosed in a medium-density fiberboard (MDF) wooden cabinet. This not only minimizes acoustic resonance, but also adds its own touch to the natural wood sound.

Precise control

Three smooth knobs on the side of the right speaker let you control bass, treble, and master volume. The wireless remote also offers

volume control and a mute function.

Easy setup

Setting up this bookshelf speaker is effortless. The dual RCA input allows you to connect to multiple audio sources.

Kit contents

2 speakers
