

Speaker 2.1 Edifier S350DB (brown)

Speaker 2.1 Edifier S350DB (brown)

Ref: 6923520265657

For sound lovers

The Edifier S350DB speaker set is a great choice for anyone who wants a great-sounding home theater but doesn't have a lot of space. The Edifier S350DB is the perfect combination of a 2.1 speaker system with pleasant and detailed sound when playing music, and full 150 watts of power when playing games or watching movies.

Full-featured speakers

Most 2.1 systems include tiny satellite speakers and make up for the small sound from the satellites with a subwoofer. With the S350DB, you get both a massive subwoofer and fully functional speakers. Connect your playback source via Bluetooth, RCA, optical, coaxial or AUX with the speakers and indulge in the sounds. Bluetooth supports aptX and a digital input supports sample rate of 24bit/48kHz.

Side panel controls

Take full control of your sound with the side panel controls, located on the side of one of the bookshelf speakers. There you'll find three knobs that control the bass, treble, and volume of the entire 2.1 system. When turned on, the power light will come on so you know the system is working.

Wireless remote control

Switch between inputs and control playback with the wireless remote control for the S350DB. Switch between optical, coaxial, auxiliary and Bluetooth inputs from a secure range. Plus, control volume or playback, and turn the speakers on and off with the wireless remote.

8-inch subwoofer for deep bass

Gain deep satisfaction from the power of bass with the S350DB when the 8-inch subwoofer activates during playback. Movies, music and games come alive when you feel the trembling power of 70 watts.

Bass Reflex port on side panel

This subwoofer features an improved bass reflex port on the side panel. This bass reflex port improves the listening experience for all types of bass sounds. Enjoy deep rumbling bass from your favorite movies, music, games and much more with the 2.1 system.

Total Power

150 Watts
