Edifier M1360 Speakers

M1360 2.1 speakers are a practical solution for any music lover. They will work well in many different applications. The satellites face up and the 4" subwoofer faces down, as a result you can enjoy crystal clear sound and enhanced bass. The included remote control will allow you to conveniently operate the device, and the 3.5mm stereo input provides the ability to connect it to specific equipment.

Sound at the highest level

The M1360 system consists of a set of 2 upward-facing satellite speakers and a downward-facing subwoofer. Its wooden enclosure provides increased vibration resistance, while the front-mounted bass reflex port delivers richly detailed sound. Both the satellites and subwoofer feature magnetic shielding, which not only gives them an elegant touch, but also means they'll surprise you with their reliability.

Simple and convenient operation

The wired remote control gives you dreamlike control over the sound. Use it to conveniently adjust the playback volume. You can also mute the speakers completely. The remote control is also equipped with an additional 3.5mm input. This allows you to connect the device of your choice to it.

Compatible multimedia speakers

The M1360 also features wide compatibility. You can successfully connect them to your computer or laptop. They will provide you with excellent quality, richly detailed sound, no matter what you are doing - whether you are listening to music, watching movies and TV series, or playing your favorite computer games.
