Wireless headphones TWS Edifier TWS1 Pro (dark grey)

### Edifier TWS1 Pro Wireless Bluetooth Headphones

Listen to music for as long as you want. The Edifier TWS1 Pro wireless headphones provide up to 12 hours of playback on a single charge. They support the second-generation aptX Adaptive codec and guarantee reliable signal transmission via Bluetooth 5.2. The improved diaphragm offers superior sound quality, and with CVC 8.0 noise-canceling technology, you can comfortably talk on the phone wherever you are.

### Excellent sound quality and low latency

Enjoy excellent sound quality and customize the audio profile to suit your needs. In creating the TWS1 Pro headphones, the next-generation aptX Adaptive codec is used, which not only supports aptX HD, but also provides ultra-low latency. So you can watch movies and TV series without interruption, or even play your favorite games - Edifier ensures perfect synchronization of video and audio.

### Your favorite songs have never sounded so good

What else makes the TWS1 Pro impress with crystal clear audio? The enhanced PU+ titanium diaphragm allows the headphones to distinguish between frequencies and the human voice, resulting in faithful reproduction of every tone and guaranteeing perfectly balanced, detail-rich sound. With Edifier, you'll rediscover your favorite songs in a new, better quality.

### Goodbye connection problems

The TWS1 features an improved Qualcomm QC3040 chip and supports Bluetooth 5.2, so you can enjoy faster and more stable signal transmission. With Edifier, you can forget about delays, stuttering and other connection problems! The technologies used also helped to reduce power consumption, thus ensuring longer headphone operating time.

### Use them how you want

Do you usually use both headphones? Or do you often use just one to hear what's going on around you? Do you like to share your music with friends? The TWS1 Pro is perfect for all of these situations and more! With Qualcomm TrueWireless Mirroring technology, each earpiece independently connects to the device of your choice. So you can quickly and conveniently switch between mono and stereo modes.

### Many hours of music listening on a single charge

The Edifier TWS1 Pro headphones will surprise you with their long runtime. Fully charged, they can play music for up to 12 hours! The included charging case provides an additional 30 hours for a total of 42 hours of listening to your favorite songs! The headphones also support fast charging. It only takes about 40 minutes to charge them to 100%.

### Talk easily on the phone

Home, work, a crowded bus, the supermarket or the mall - with the TWS1 Pro you'll be able to talk on the phone, wherever you are, with ease. The dual microphones optimally capture the human voice and the CVC 8.0 noise-canceling technology effectively eliminates unwanted noise. All this gives you the confidence that you can hear your caller perfectly, and they can hear you!

### A simple touch

Want to turn down the music or stop the playback but don't have your smartphone at hand? No problem! Each headphone is equipped with an easy-to-use touch panel, so that all useful functions are always at your fingertips. For example, you can adjust the volume, pause and resume playback, reject phone calls and switch tracks.

### Excellent for everyday use

Do you see rain coming? Or maybe you are going for an intensive workout? No worries - you can still listen to your favorite tunes! The IP65 rating means drops of rain, sweat, or dust don't pose a threat to the TWS1 Pro. These unique headphones can accompany you almost anywhere! They are also incredibly light and comfortable. They fit perfectly in your ears so they won't annoy you by constantly falling out.
