Edifier G5000

Wireless speakers with Hi-Res audio sound quality meet the highest digital standards. Supported music, game and movie modes will let you choose the right tones according to the situation. An 88W digital amplifier output and built-in DSP technology deliver clear, noise-free sound. Experience unforgettable immersive experiences and unprecedented new levels of intense gameplay. The geometric shape and 11 available lighting effects are great for complementing your gaming desk.

Great interior

With the flagship acoustic setup, you will detect incoming enemies without any problem and anticipate their movements in an instant. The resolution capability of the digital audio chip reaches up to 24bit/192kHz. The Hi-Res audio system means you can hear even the smallest details perfectly. And the 88W digital amplifier, together with the titanium treble and bass drivers, ensure a well-balanced transfer. Digital signal processing technology gives you the ability to modify the sound, without losing its quality.

Many possibilities

Precise dynamic management of the DSP chip makes the G5000 a versatile piece of equipment with numerous applications. The three sound effect modes are carefully tuned settings to meet any requirement. To achieve individual tonality while listening to music, watching an exciting movie, or relaxing during your favorite game, all it takes is a flick of the wrist to change to the right mode.

A comprehensive message

If you need a device that impresses with fast and lag-free transmission in any situation, the G5000 will definitely come in handy. You don't have to worry about compatibility issues either. It doesn't matter what model you're using because Edifier features a versatile range of interfaces. The built-in AUX, USB, optical and coaxial ports allow you to connect various accessories. In addition, there is the possibility of pairing via Bluetooth 5.0 version with aptX codec.

Energetic colors

High-end speakers combine practical yet ingenious design in a simple way. They attract attention with their modern, colorful character. Colorful LED backlighting gives them an interesting appearance. Create your own gaming atmosphere by choosing from 11 available light effects. Customize the lighting to your liking and ensure a unique gaming atmosphere.

Unique design

Edifier speakers impress with both functionality and unique, stylish design. Without sacrificing ease of use, quick response is possible. Adjusting the design at a 10° upward angle will give you an even more immersive experience. The interestingly shaped design is a remarkable addition to your gaming décor. It eliminates acoustic resonance, ensuring that annoying noises are completely silenced.
