Edifier GT4 TWS Gaming Headphones

Immerse yourself in the gameplay and take another great victory. The TWS Edifier GT4 wireless headphones feature a state-of-the-art PixART PAU190X chip and support Bluetooth 5.2 for a fast connection, low latency of around 45ms and a long battery life of up to 7 hours on a single charge. The H+ sound effect will let you enjoy the immersion of your dreams, and the built-in touch panels allow you to operate the headphones conveniently.

Bluetooth 5.2

Say goodbye to delays and other connection problems. Bluetooth 5.2 and the advanced PAU190X chip guarantee fast and stable signal transmission. They also provide resistance to interference. What's more, the ultra-low latency of about 45ms lets you enjoy perfect synchronization between video and audio. This makes GT4 perfect for dynamic gaming! What's more, each earpiece supports an independent connection, so you can freely use them both at the same time, just the left or just the right.

The immersion of your dreams

Get the edge in your next game and enjoy a high level of immersion. The headphones feature H+ sound effect, which accentuates the sound of footsteps and gunshots, among other things. So you can easily locate your opponents and not be surprised! What's more, GT4 are equipped with dynamic 10mm drivers with composite diaphragms, which guarantees an extended sound field, natural, clear sound

and exceptional richness of details.

2 playback modes

Adapt the performance of your headphones to the situation. GT4 lets you choose from 2 playback modes. If you're going to play the game of your choice and want low latency, choose gaming mode, which offers, among other things, an immersive H+ effect. The music mode, on the other hand, offers a more dynamic sound field, improved HiFi performance and perfect harmony. Perfect for listening to music!

Up to 7 hours operating time

Don't worry that the headphones will run out of power too quickly and disrupt your game. Thanks to built-in rechargeable batteries with a capacity of 40mAh and advanced PAU190X chip, fully charged GT4 can operate for up to 7 hours. What's more, the included charging case can extend that time to about 28 hours. Charging the headphones will not take long - about 1.5 hours is enough.

Touch panels

Experience how easy and convenient it can be to operate the headphones. You don't even have to reach for your phone every time - with the Edifier GT4, everything you need is always at your fingertips! The headphones have built-in user-friendly touchpads that allow you to handle incoming calls, pause / resume playback, select mode and switch tracks, among other things.

Stunning design

Play your favorite games and listen to your music as long as you like - no discomfort or fatigue with GT4. The headphones fit snugly in your ears and are extremely light, weighing just 4.3g each. What's more, the ergonomic design makes them extremely comfortable. They are also distinguished by original, modern design. Futuristic design and dynamic RGB backlighting give them a unique, gaming character.

They can handle tough conditions

Edifier GT4 headphones can accompany you in almost all conditions. They are water- and dustproof to IP55, so you can take them with you on a training session, a walk or a bike ride. They are not afraid of rain, accidental splashing, sweat or dust. Are you leaving the house and you see that it is about to rain? Or are you going to do a series of intense exercises? Don't give up listening to your favourite songs!
