Edifier X3s

The X3s wireless headphones are a successful solution that combines both convenience and stylish, thoughtful design. They are sure to deliver excellent sound quality and a stable, uninterrupted audio signal transfer. You don't have to worry about compatibility issues, as Bluetooth 5.2 connectivity will allow you to connect with most modern models on the market. In addition, the compact design offers easy transport of the headphones, so you can enjoy the company of your favorite songs at home, or on a long journey.

Goodbye annoying noise

Effective CVC 8.0 noise cancellation combined with smooth transmission ensures hassle-free phone calls, no matter where you are at the moment. Take all incoming calls on the bus ride home or in a crowded supermarket without worrying about any interference. Nuisance noises from outside are thoroughly eliminated, leaving the audio signal clear and crisp. This allows you to freely communicate with your loved ones from any crowded place.

Precise gaming mode

Advanced gaming enthusiasts will delight in the incredibly synchronized audio and video available in gaming mode. Low latency during gaming is used to detect an incoming enemy and gives you a chance to react instantly. Better projection as well as excellent audio and video synchronization will make you find yourself in a magical world with ease. Moreover, numerous unforgettable immersive

experiences are possible as a result.

Reliable connection

With the latest Bluetooth 5.2 technology and aptX encoding system, the audio signal features extremely fast data transfer. The Qualcomm aptX HD codec with a coding rate of up to 352 kbps is responsible for lossless and richly detailed deep tones, among other things. The overall effect is close to the level offered by CDs.

Perfect for any situation

X3s are distinguished by their small size and distinctive shape, allowing you to take them with you virtually anywhere. They allow you to listen to energetic songs while cleaning, intense exercise and on the contrary - the awaited relaxation after a long, exhausting day. Working time is up to 8 hours of continuous playback. The set comes with a charging case that extends the operation of the headphones up to 28 hours. You can successfully fit them in your pocket, backpack or bag without any additional weight, because their weight is only 62 g.

Multidirectional protection

Edifier's professional headphones are designed to meet all your needs and requirements in many ways. They have full dust, dust and water resistance according to IP55 class waterproof system. Ergonomic design provides the ultimate comfort during hours of entertainment. The practical design allows proper positioning in the ears and prevents falling out when making sudden movements.

Intuitive remote control

Both headphones feature a responsive touch panel that provides remote control of basic functions without the need to reach for a smartphone. With just a flick of your wrist, you can seamlessly reorder and pause music, activate the voice assistant, answer or reject a call, or activate a special gaming mode. This means that operating the X3s is extremely convenient and trivially easy.
