Edifier MR4 speakers

Advanced Edifier MR4 speakers will find use not only at home, but also in a recording studio, for example. They are designed to provide excellent sound quality and offer 2 playback modes - Monitor and Music. Convenient in use knob provides easy access to their functions, and several available ports such as TRS, AUX or RCA allow you to connect many different devices.

Superior sound quality

To give you the highest audio quality, the speakers have been professionally tuned by the experts at Edifier Acoustic Lab. With a class-D amplifier and a 4-inch woofer, the frequency can be lowered to 60Hz, and the use of DSP ensures even more interesting sound. The MR4 also has an advanced frequency divider for better input signal and sound clarity.

Created for music lovers

The speakers are designed to deliver the most beautiful sound possible. The 1-inch silk-diaphragm tweeter and specially designed integrated cone front panel ensure clear, crisp highs. You can also enjoy incredible rich detail and emphasized bass thanks to the PP cone with MICA-complemented diaphragm.

2 playback modes

With 2 available modes, these speakers are perfect for a variety of applications. If you're a music producer and sound engineer, you'll appreciate the Monitor mode, which lets you hear every detail. For everyday use, the Music mode will highlight the best of your favorite songs.

Easy operation

The operation of the devices is extremely simple and intuitive. The MR4s are equipped with a multi-function knob that provides convenient access to their most important functions. Simply press and hold it to turn the speakers on or off, twist it to adjust the volume and press it twice to change the playback mode.

Multiple inputs available

The speakers have several available inputs so you can connect various devices to them. The TRS Balanced 6.35mm ports allow you to connect the MR4 to a console, mixer or other professional equipment with +4dBu input sensitivity. You can also use the 2 RCA Unbalanced inputs. What's more, on the front panel of one of the speakers you will find an AUX input and an additional output port that allows you to connect headphones.

Upgraded design

Not only do the MR4s deliver perfect sound quality, but they also look extremely elegant and stylish. The wooden cabinet made of MDF gives them a timeless character and makes them a perfect addition to any interior design. It is also important for the sound quality as it reduces acoustic resonance and minimizes unwanted vibrations.
