Edifier HECATE GX04 TWS Headphones (grey)

Looking for headphones that will give you great sound quality while gaming and listening to music? Edifier HECATE GX04 are just for you! Bet on crystal clear sound and modern technologies that increase the functionality of the equipment. The devices offer a long operating time, stable connection via Bluetooth 5.2 and 2 modes of operation. They also provide ultra-low latency of 40 ms.

High-quality sound

HECATE GX04 provide crystal-clear sound, allowing you to feel the atmosphere of your favorite games at an unprecedented level! They are equipped with dynamic 10 mm drivers, which translate into excellent quality of high, medium and low tones. A special Music mode will sharpen the detail of the generated sounds, revealing new musical experiences for you!

Even more immersion

Activate Game Mode and gain the edge over your online opponents right from the start! H+ sound effects, combined with amplified footsteps and gunfire, give you the chance to prepare for a duel before it even starts. What's more, the ultra-low latency (40 ms) ensures near-perfect synchronization of video and audio - even during highly dynamic gameplay.

Powerful power supply

The headphones have a runtime of up to 7 hours, and the charging case extends that to up to 28 hours. So you can play without limit and listen to music without worrying about sudden discharge. GX04 also support 2C fast charging technology, so 15 minutes of charging allows you to use the headphones for another 2 hours.

Convenience of use

Touchpads provide instant access to key functions - without pulling out your smartphone! You can pause and resume playback, or answer and end calls. You can also manage the backlight and operating mode. In addition, they are extremely light and comfortable, and the IP54 waterproof rating will allow you to use them in the rain or during training.

Stable connection

The Bluetooth 5.2 module is responsible for a stable and trouble-free connection between the equipment and your device. Forget about delays and sound distortions - they are an echo of the past! Each headphone connects to the source independently, giving you the option to use only one of them. So enjoy the way you like - without restrictions and compromises!

Set includes

Headphones
