Edifier HECATE G5BT gaming headphones (black)

Do you value wireless solutions? Choose the Edifier HECATE G5BT gaming headphones and enjoy high comfort and low latency of 45 ms. The 40-millimeter drivers deliver high quality sound and the microphone with ENC enhances communication. The G5BTs provide up to 40 hours of wireless operation, their added bonus is RGB backlighting.

Perfect synchronization of image and sound

The Edifier HECATE G5BT headphones are an excellent proposition for fans of dynamic games, as the headphones are distinguished by extremely low latency of 45 ms. They use a high-end PixArt gaming chip, which allows to reduce latency by 25% compared to ordinary gaming headphones.

Hear every detail

The G5BT are equipped with 40mm titanium drivers that deliver dynamic bass and crisp treble. High-quality sound enhances immersion during gaming and makes you hear your opponent's every move and step. Importantly, the headphones are also Hi-Res Audio certified.

Efficient communication

The Edifier HECATE G5BT has an ENC-enabled microphone that ensures excellent voice quality and effectively reduces ambient noise by

up to 90%. Not using the microphone at the moment? Its design means you can stow it away when needed and enjoy even more comfort.

RGB backlighting

Want to spice up your gaming rig? The Edifier HECATE G5BT gaming headphones are the perfect way to do so. They have been equipped with RGB backlighting, which perfectly matches the design of the headphones and can be an interesting source of light during a night gaming session.

Long runtime and two ways to connect

Take advantage of Bluetooth 5.0 connectivity without worrying about sudden equipment outage. The headphones have an 800 mAh battery that provides up to 40 hours of operation without backlighting and 17 hours of operation with backlighting. You can also use the 3.5mm AUX cable to connect to your laptop, computer or iPad.

Functional and comfortable

The headphones have practical buttons, thanks to which you can easily adjust the volume, turn the RGB backlighting on or off, or switch between Game and Music modes. The adjustable headband, earcups with shape memory foam and foldable design for easy storage also contribute to comfort.
