Edifier STAX S3 Wireless Headphones

Discover a new dimension in music experience with the Edifier STAX S3 wireless headphones! Powerful planar magnetic drivers deliver crystal-clear sound, while support for advanced audio technologies and codecs further emphasises the richness of the sound. The powerful power supply allows for up to 80 hours of operation, and the design of the device ensures maximum comfort.

Crystal-clear sound

Your favourite tracks have never sounded better! The headphones are equipped with top-class planar magnetic drivers, which are responsible for generating sound of impressive quality. What's more, support for the latest technologies (Snapdragon Sound, Hi-Res Audio, Equal Mass) and support for ACC, SBC and Qualcomm aptX Adaptive audio codecs guarantee clear sound that lets you discover your favourite tracks anew.

2 connectivity options

The headphones are equipped with reliable Bluetooth 5.2, which ensures an uninterrupted, stable connection to your audio source. What's more, you can pair them with 2 devices at the same time to switch freely between them in real time. And if you want, you can take advantage of the wired connection - using an AUX cable or a 3.5-6.35 mm adapter (included).

Powerful power supply

Forget about having to charge your headphones every few hours of use! Edifier STAX S3 can achieve up to 80 hours on a single charge! This is thanks to the components used and the use of Bluetooth 5.2, which significantly reduces power consumption. You can recharge the 1500 mAh battery with the USB-C cable (included), and a 10-minute process will restore power for another 11 hours of listening!

Thoughtful design

The construction of the device has been designed to increase the comfort of use even during long sessions. Carbon fibre has been used to achieve a low weight for greater comfort, while detachable mesh earcups with cooling mesh add to the pleasant wearing experience. Opt for a combination of functionality, quality and comfort - without compromise!

More possibilities with an app

Want more control over your headphones? Install the Edifier Connect app and get access to EQ settings, low-latency gaming modes and much more. It's all at your fingertips!
