Computer Soundbar Edifier MG300 (black)

The Edifier MG300 computer soundbar is the perfect combination of functionality and stylish design. With 52mm drivers, it delivers fantastic sound quality. It also offers 2 playback modes. Enjoy reliable Bluetooth 5.3 connectivity and use the built-in microphone to communicate freely with your friends. The device is powered by a USB cable. It also has a built-in sound card and features dynamic RGB backlighting.

Various connection possibilities

You can connect to the soundbar in 2 ways. Use the USB cable if you want. The MG300 has a built-in sound card, making it ideal even for computers with only one available USB port. Prefer to go wireless? Connect to the soundbar with reliable Bluetooth 5.3, which provides fast and stable transmission with a range of up to 30m.

Fantastic sound quality

Enjoy excellent sound quality when you're listening to music or playing games. The MG300 is equipped with 2 52mm drivers. Each one has been professionally tuned 30 times and has a power output of 2.5W. This allows the device to deliver natural yet crisp highs as well as deep, powerful bass. With Edifier, you'll discover previously unknown details of your favorite songs!

2 playback modes

Customize the computer soundbar to suit your needs and give yourself an unforgettable experience. The MG300 lets you choose from 2 playback modes. Music mode emphasises vocals and provides fantastic sound quality while listening to songs. Game mode is ideal for gaming. It makes all sorts of details more audible. Now you'll be able to hear your opponent and send a bullet towards him with ease!

Stunning design

The MG300 not only delivers great sound quality, but also looks great on your desk. It's equipped with colorful RGB backlighting, which gives it a modern gaming character. It also has a stylish metal mesh and comfortable to use silicone buttons. Additional anti-slip pads give the device the stability it needs, and the sloped design minimizes glare. Up to 6 backlight modes are also available.

Built-in microphone

The surprises don't end there! The MG300 computer soundbar is also ideal for networked gaming. It has been equipped with a small microphone, which will allow you to talk to other players without any problems. What's more, the special silicon cover isolates external vibrations so you can enjoy crystal clear sound during voice calls. With Edifier, you can be sure the other team members will hear you perfectly!
