Edifier R19BT 2.0 speakers

Opt for a successful combination of high-quality sound and stylish design. Edifier R19BT 2.0 speakers are equipped with 2.75-inch drivers and stand out with 2W + 2W power. This allows them to deliver clear, richly detailed sound. You'll connect them to the device of your choice in 3 ways - via USB or AUX cable, as well as via Bluetooth 5.3. A headphone output is also available.

High quality sound

Give yourself an unforgettable musical experience. The R19BT use 2.75-inch drivers to deliver excellent audio quality. What's more, thanks to a clever design, the right and left speakers play at identical volume, resulting in a perfectly balanced stereo effect. Both units are also slightly upward-facing, so that clear sound can reach your ears optimally. There's also a Bass Reflex port on the front of the speakers for deep, powerful bass.

Several connectivity options

Enjoy freedom. The R19BTs support Bluetooth 5.3, so you can connect them to the device of your choice wirelessly without worrying about lag or other signal problems. In addition, a built-in sound card allows you to connect them to your computer via a USB cable. An AUX port is also available. Using it, you can connect the speakers to additional devices, such as a phone.

User-friendly

The R19BT speakers not only play great, but are also extremely easy to use. On one of them you'll find a large 25-millimeter multi-function knob, which you can use to quickly turn the devices on or off, as well as adjust the volume. With Edifier, everything you need is at your fingertips! There is also a jack output on the front of one of the speakers, so you can conveniently plug in your headphones at any time.

Stunning design

Bet on the perfect combination of functionality and aesthetics. R19BT speakers impress not only with high quality sound - they also look exceptionally modern and elegant at the same time. Black color and simple design give them an original, stylish character - a great addition to almost any arrangement! What's more, details such as the white dust cover provide an even more interesting visual experience.
