TWS Edifier W240TN Headphones

The Edifier W240TN TWS headphones are equipped with dual drivers for high quality sound. Bluetooth 5.3 is responsible for fast and stable connection, and active noise cancellation will help you cut off the noise. You can also take advantage of the features and settings available in the Edifier Connect app. The headphones are also distinguished by their IP55 water resistance and long operating time.

Even better sound quality

What makes the headphones play so well? The W240TN are equipped with dual dynamic coaxial drivers, so you can enjoy rich detail and perfect harmony. The 10-millimeter woofer and 6-millimeter tweeter driver provide deep, powerful bass, ear-pleasing treble and a wider frequency response. Provide a more interesting musical experience and discover previously unknown details of your favorite songs!

Active noise cancellation

Say goodbye to annoying noise. The headphones support active noise cancellation, so you can cut off unnecessary noises and listen to music or your favorite podcast without interruption. Prefer to hear what's going on around you? Choose Ambient Sound mode and customize it in the Edifier Connect app. This way you won't miss an important announcement at the train station or information told by co-workers!

Bluetooth 5.3

Problems with wireless connection quality are a thing of the past. Advanced Bluetooth 5.3 technology guarantees fast and stable transmission, lower power consumption and high immunity to interference. A special gaming mode is also available, with a latency of only about 80ms. This is an ideal option for gamers - perfect synchronization of video and sound will make it easy to beat your opponents!

Talk on the phone

You can also comfortably talk on the phone with the Edifier W240TN - even in extremely noisy environments. The AI DNN noise cancellation technology reliably eliminates unnecessary sounds while emphasizing the sound of your voice. A crowded bus, a city center, a supermarket - be assured that your interlocutors will hear you perfectly wherever you are.

Long operating time

No more worries that the headphones will drain too quickly. The W240TN can play music for up to 7 hours when noise reduction is on, or up to 8.5 hours if you turn it off. The included case allows you to extend this time to 21 hours or 25.5 hours, respectively. Now you can freely listen to your favorite songs at work, at home and while traveling! What's more, you only need about 10 minutes of charging to play music for another 2 hours.

Comfort of use

In the set you will find not only the headphones, but also 4 pairs of eartips in different sizes (XS, S, M and L). This allows you to optimally adjust the product to your needs and enjoy comfortable use. The W240TN fit perfectly in the ears, and are conveniently operated with built-in buttons. The headphones also support voice assistant and are distinguished by IP55 water resistance - use them during your workout without worry. They also feature a modern, stylish design.

More possibilities with the app

Ensure you have access to many additional features and settings. Just install the free Edifier Connect app and pair your headphones with it! For example, you can use the EQ and timer settings. It's also possible to change the mode or soundproof your voice in call mode. You can also use your smartphone to set button functions. Say goodbye to the need to limit yourself to factory settings!
