Edifier HECATE G5BT gaming headphones (grey)

Do you value wireless solutions? Choose the Edifier HECATE G5BT gaming headphones and enjoy high comfort and low latency of 45ms. The 40-millimeter drivers provide high quality sound, and the microphone with ENC improves communication. The G5BTs provide up to 40 hrs of wireless operation, their RGB backlighting is an added bonus.

Perfect synchronization of video and sound

The Edifier HECATE G5BT headphones are an excellent choice for fans of dynamic gaming, as the headphones are distinguished by an extremely low latency of 45 ms. They make use of a high-end PixArt gaming chip for this purpose, which reduces the latency by 25% compared to ordinary gaming headphones.

Hear every detail

The G5BT are equipped with 40-millimeter titanium drivers that deliver dynamic bass and crisp treble. The high-quality sound contributes to increased immersion during gaming and makes you hear every move and step of your opponent. Importantly, the headphones are also Hi-Res Audio certified.

Efficient communication

The Edifier HECATE G5BT have an ENC-enabled microphone, which ensures excellent quality of your voice and effectively reduces ambient noise by up to 90%. Momentarily not using the microphone? Its design means you can tuck it away when needed and enjoy even more comfort.

RGB backlighting

Want to make your gaming stations more attractive? The Edifier HECATE G5BT gaming headphones are the perfect way to do so. They have been equipped with RGB backlighting, which perfectly matches the design of the headphones and can be an interesting source of light during a night gaming session.

Long operating time and two ways to connect

Enjoy Bluetooth 5.0 connectivity without worrying about sudden hardware drainage. The headphones have an 800 mAh battery that provides up to 40h of operation without backlighting and 17h of operation with backlighting. You can also use the 3.5mm AUX cable and connect to your laptop, computer or ipad.

Functional and comfortable

The headphones have practical buttons that allow you to easily adjust the volume, turn the RGB backlight on or off, or switch between Game / Music modes. Also contributing to the comfort of use are the adjustable headband, ear cups with shape memory foam and foldable design for easy storage.
