

Car speaker, Edifier G651A

Car speaker, Edifier G651A

Ref: 6923520231218

Car speaker, Edifier G651A

If you're looking for an in-car speaker that delivers unmatched sound quality and durability, no matter the conditions, the Edifier G651A is an ideal choice. The tweeter features a 25mm diaphragm made of silk, and uses a magnetic ferrofluid to cool the coil. This innovative design guarantees extremely clear and precise sound, allowing you to fully experience all musical nuances. The woofer is made of injection-molded PP plastic, making it lightweight and resistant to car conditions. It faithfully reproduces sounds with frequencies of 65Hz-20KHz, so you can enjoy full bass and treble, regardless of your preferred music. The speaker's peak power output is 120W, which means it will give you a solid musical experience.

High quality and directional sound

What else makes the Edifier G651A so good? The speaker responsible for the treble is positioned at a specific angle, providing an optimal experience for the listener sitting in the car. This ensures that the sound is directed where you need it most. The speaker stands out for its wide compatibility and is sure to integrate with your car's audio system.
