Processor DSP, Edifier DP680

Ref: 6923520232598

DSP processor, Edifier DP680

Get the most out of your car's audio system and embark on a musical journey with Edifier. The DSP processor will allow you to improve the parameters of your audio signal for a top-notch music experience. Equipped with 6 LO inputs, 6 HI channels and 8 RCA outputs, it will allow you to connect various audio sources and multiple speakers. Each channel is equipped with a graphic equalizer, so the sound will be perfectly balanced. The wide frequency response provides almost the full range of sounds audible to humans, so you will be moved by deep bass and delighted by clear treble.

Sound tailored to your needs

The processor offers several useful features to help you create the perfect audio environment in your car. Time delay ensures sound synchronization between different speakers, while ButterWorth (6, 12,18, 24,36, 48dB/Oct), Bessel (6, 12,18, 24,36, 48dB/Oct), Linkwitz (12, 24, 36, 48dB/Oct) crossovers and high-pass, low-pass, or bandpass filters let you customize the sound to your preferences.

□ Frequency response:

□ 30Hz-18kHz

□ Impedance:

□ 4 Ohms

□Weight:

□0.82kg

□DSP output level

□Max 2VRMS (DSP gain-0dB).

□DC

□10V-15V

□Dimensions

□182 x 38 x 142 mm
