Sharing Switch Box Edifier AUA-SW10 (White)

Sharing Switch Box Edifier AUA-SW10 (White)
The Edifier AUA-SW10 analog Switch Box will allow you to connect up to 10 active speakers or headphones to a single audio source, such as a computer, laptop or gaming console. It is equipped with one 2RCA input and as many as 10 2RCA outputs. An additional preamplifier output is also available. Such a solution will come in handy, for example, for people who use multiple audio equipment - it makes it easier to switch between devices.

Convenient operation
The switch is equipped with 10 buttons, which allow you to conveniently switch between the speakers and headphones plugged into it. It also offers a practical volume control knob (for outputs 1 to 10). There are also 2 additional buttons located on the side of the device - with these you can use functions such as MUTE and Panorama. This gives you even more control over the sound!

In the box
Switch box
Power adapter
2RCA to 2RCA cable
3.5 mm cable to 2RCA

3.5mm cable (socket) to 2RCA x10
