

### Wireless headphones TWS Edifier NeoBuds Pro 2, ANC (black)

Ref: 6923520246984

Wireless headphones TWS Edifier NeoBuds Pro 2, ANC (black)

Edifier NeoBuds Pro 2 TWS Headphones, ANC (Black)

Edifier NeoBuds Pro 2 are high-quality headphones offering premium sound - they have the Hi-Res Audio certificate awarded to devices providing better sound than CDs. Thanks to the capacious batteries, you can enjoy music for 4 hours on a single charge, and with the charging case - for another 12 hours. Equipped with a total of 8 microphones with Environmental Noise Cancellation (ENC) function, you can converse freely without repeating yourself. The 7 pairs of ear tips included in different sizes ensure that the earbuds stay firmly in your ears. Moreover, the wearing detection feature automatically pauses and resumes playback, so you don't miss your favorite part of a song. The spatial sound provides extraordinary listening experiences. Do you like playing games? Great, because the gaming mode offers smooth audio-visual synchronization, making victories even easier. The Ambient Aware mode allows you to listen to music and stay in touch with the surroundings, so you can safely jog or wait at the station or airport without missing important announcements. Sounds good? And that's just part of the features!

Broadband Multi-channel ANC by Edifier

ANC is an acronym for Active Noise Cancelling, which means you don't hear the noises from the surroundings. This allows you to immerse yourself in music or get into a series while sitting on a train, waiting in line, or walking through the city center. NeoBuds Pro 2 feature recently patented technology that ensures even better capturing of unwanted sounds.

### Long Battery Life and Wearing Detection

4 hours on a single charge extended by another 12 hours with the charging case is the result achieved by NeoBuds Pro 2 with ANC on, while when it is off, you can listen to music for 5.5h extended by 16.5h. Still an hour of travel left and you are only halfway through the movie? Charge the headphones for 15 minutes, and you get another 2 hours of listening! Someone asks you something? Thanks to the wearing detection feature, the earbuds detect whether they are being worn - if you take off one or both, they automatically pause the music and resume it when put back on.

### Touch Panels

Both earbuds are equipped with touch panels that allow you to control playback, handle calls, and switch between modes without reaching for your phone. Just touch the left or right panel a certain number of times, and you will activate the assigned function.

### High-Quality Sound

NeoBuds Pro 2 not only have the Hi-Res Audio certificate but also LDAC and LHDC codecs, ensuring support for a very wide frequency range 20Hz-40KHz (LDAC) and guaranteeing fantastic sound quality transmitted via Bluetooth. The built-in Bluetooth 5.3 module offers stable, interference-free connection, so you can fully enjoy the audiophile experiences provided also by the spatial sound with head tracking, giving you a sense of being surrounded by captivating, realistic sound from all sides, regardless of which way you turn your head.

### Quality Conversations

Each earbud is equipped with 4 microphones with ENC function, which reduces environmental noise while isolating your voice, so your interlocutors can hear you clearly and distinctly.

### During Workouts and Travel

Ambient mode is a fantastic solution for people who travel a lot and like to listen to music while waiting at the station or airport. This mode lets you enjoy the sound of the played songs and remain aware of the surroundings, i.e., hear announcements. Athletes and those who enjoy physical activity will also appreciate this feature as it increases safety. Moreover, the IP54 protection guarantees dustproof and protection against sweat or rain.

### Edifier Connect and a Host of Additional Benefits

Expand your possibilities with the Edifier Connect app! It gives you access to the equalizer (EQ), additional settings, the ability to change the LED colors to 8 different versions, and more! Among the additional advantages of the earbuds, they have the TWS mirroring function, which allows setting any earbud as the main one, maintaining the Bluetooth connection.
