Edifier WH700NB Wireless Headphones with ANC (Beige)

WH700NB are wireless headphones equipped with ANC (Active Noise Cancellation), which means active noise reduction functionality. Thanks to it, external noises are muted so you can listen to music or hear people clearly without disturbances. The built-in Bluetooth 5.3 module provides a stable and fast connection with up to two devices simultaneously, allowing you to switch between them effortlessly. 40mm dynamic speakers ensure fantastic sound quality for up to 68 hours without ANC or 45 hours with ANC enabled. Just 10 minutes of charging gives you an additional 8 hours of playtime! Equipped with a microphone with DNN (Deep Neural Network) technology, it ensures that your voice remains clear to the caller even in noisy environments. With a gaming mode, the headphone latency is only 0.08s, ensuring perfect audio-visual synchronization. On the other hand, with the ambient mode, you can listen to music while staying aware of your surroundings, for example, when waiting at a train station or airport. Sounds good? The Edifier Connect app enhances your capabilities even further!

Ultra-Long Battery Life

The built-in batteries in WH700NB headphones provide you with up to 68 hours of music playback without ANC and up to 45 hours with ANC enabled - almost two full days! Is your battery running low, and you're only halfway through a movie? Just charge the headphones for 10 minutes, and you'll gain another 8 hours, enough to watch up to 4 more movies!

ANC, Active Noise Cancellation

Having a bad day, and you want to listen to music for comfort, but the noise around you is making it worse? Turn on the ANC function, which will eliminate all noise and distractions, allowing you to relax and immerse yourself in the music.

DNN, Deep Neural Network

This feature ensures smooth and clear conversations when using the WH700NB headphones. This precise technology captures your voice even in noisy environments, making it clearly audible to your callers. No more frustrating repetitions - with DNN, that's a thing of the past!

Wireless Connectivity

The Edifier WH700NB wireless headphones are equipped with Bluetooth 5.3, allowing you to wirelessly connect to devices such as smartphones, laptops, or computers. What's more, you don't have to limit yourself to just one device - you can connect to two devices simultaneously and switch between them conveniently! Additionally, the headphones have 4 buttons that allow you to control playback, access different modes, adjust the volume, and more! You don't need to reach for your phone, and it can be up to 10 meters away while your music keeps playing!

Choose the Right Mode for You

Are you an avid gamer who values smooth synchronization between audio and video? With the gaming mode, winning will be easier than ever with a latency of only 0.08s! If gaming isn't your thing and you prefer sports or travel, the ambient mode is your best choice if you want to listen to music while staying in touch with your surroundings.

Lightweight and Compact

The Edifier WH700NB wireless headphones are incredibly lightweight, weighing only 271g, and their foldable design makes them perfect for traveling to the ends of the earth, as well as for work or school. They easily fit in your backpack to accompany you during special moments or to brighten up your daily routine.

Get More with the App

With the Edifier Connect app, you can expand the capabilities of your headphones, gaining access to equalizer (EQ) settings, relaxation-enhancing sounds, button configuration options on the headphones, and more! Discover what else you can achieve with the Edifier Connect app!
