TWS Edifier X5 Pro Headphones (black).

Say goodbye to annoying noise and focus on your favorite songs. The TWS Edifier X5 Pro headphones offer active ANC noise cancellation, and with dynamic 10mm drivers with titanium-coated diaphragm, they guarantee excellent sound quality. They are also distinguished by their long operating time (up to 7 hours) and IP55 water resistance. In addition, built-in microphones allow you to make phone calls freely, and the dedicated Edifier Connect app provides access to many additional features. The headphones also support a special Game mode, which allows you to enjoy extremely low latency.

Forget about annoying noise

Want to listen to your playlists or your favorite podcast in peace? With the X5 Pro, you'll effortlessly cut off unnecessary sounds and focus on what's most important to you! The headphones support active ANC noise cancellation, so they effectively drown out unwanted noises. There's also a transparent mode, which allows you to listen to music without losing touch with your surroundings. No longer do you have to worry about missing an important announcement at the airport or not hearing a message relayed to you by a co-worker! You can also conveniently switch between modes using the dedicated app.

High quality audio in any situation

Enjoy fantastic audio quality when you listen to music and when you talk on the phone. The X5 Pro headphones are equipped with

10-millimeter dynamic drivers, so they can offer crisp, detail-saturated sound. Also noteworthy are the supported audio codecs - the widely used SBC and Apple's primarily used AAC. These provide even better sound and compatibility with a wide range of devices. In addition, each handset has a built-in microphone using AI algorithms to guarantee you clear, natural sound during phone calls as well. This way you and your callers can hear each other without any problems!

Low latency

The headphones offer Bluetooth 5.3 connectivity with support for A2DP, AVRCP and HFP profiles to ensure fast, stable and reliable signal transmission with a range of up to 10 meters. The manufacturer has also prepared something special for gamers - an additional Game mode is available, which guarantees an incredibly low latency of just 0.08 seconds. Perfect synchronization of video and audio will make sure that you will not be surprised by your opponents - gain the advantage already at the start and enjoy exciting gameplay!

Long working time

Thanks to powerful batteries, you don't have to worry about your headphones draining too quickly. The X5 Pro can play music for about 5 hours when ANC mode is on, or for about 7 hours if you don't use it. Moreover, the included charging case allows you to extend this time to 22 or 31 hours, respectively. But that's not all - with just about 15 minutes of charging the headphones, you can listen to your favorite songs for another hour!

Additional capabilities with the app

Get even more out of your headphones. All you have to do is install the dedicated Edifier Connect app, which offers plenty of interesting features! With it, for example, you can customize the touch control to your preferences, as well as change the equalizer (EQ) settings - there are 3 ready-made presets, such as classic, pop and rock classic. You can also switch between noise reduction and transparent mode.

For your comfort

The headphones are very light and comfortable, so you can listen to your favorite songs for hours without worrying about discomfort or fatigue. They are also distinguished by their IP55 dust and moisture resistance - you can successfully use them even during intense workouts. You'll also find interchangeable rubber bands in three sizes (S, M, L) in the set, so you have the opportunity to adjust the X5 Pro to your needs even better.

Included

Headphones
Charging case
Interchangeable rubber bands (3 pairs - S, M, L)
