TWS earphones Edifier X5 Pro (ivory)

Say goodbye to annoying noise and focus on your favorite songs. Edifier X5 Pro TWS earbuds offer active noise cancellation (ANC), and with 10mm dynamic drivers with a titanium-coated diaphragm, they ensure excellent sound quality. They also feature a long battery life (up to 7 hours) and IP55 water resistance. Additionally, built-in microphones allow for seamless phone calls, and the dedicated Edifier Connect app provides access to many additional features. The earbuds also support a special Game mode, which allows for exceptionally low latency.

Forget About Annoying Noise

Want to listen to your playlists or favorite podcasts in peace? With the X5 Pro, you can easily block out unnecessary sounds and focus on what matters most to you! The earbuds support active noise cancellation (ANC), effectively suppressing unwanted noise. You also have the option of a transparent mode, allowing you to listen to music without losing touch with your surroundings. No need to worry about missing important announcements at the airport or not hearing information from your colleague anymore! You can conveniently switch between modes using the dedicated app.

High-Quality Sound in Every Situation

Enjoy fantastic audio quality whether listening to music or talking on the phone. The X5 Pro earbuds are equipped with 10mm dynamic

drivers, offering crisp, detail-rich sound. The supported audio codecs—commonly used SBC and primarily used by Apple AAC—ensure even better sound and compatibility with a wide range of devices. Additionally, each earbud has a built-in microphone using AI algorithms to ensure clear, natural sound during phone calls. This ensures smooth communication between you and your callers!

Low Latency

The earbuds offer Bluetooth 5.3 connectivity with support for A2DP, AVRCP, and HFP profiles, providing fast, stable, and reliable signal transmission up to 10m. The manufacturer has also prepared something special for gamers—a dedicated Game mode, which guarantees incredibly low latency of just 0.08s. Excellent synchronization of image and sound will keep you ahead of your opponents—gain an advantage from the start and enjoy thrilling gameplay!

Long Battery Life

Thanks to efficient batteries, you don't have to worry about the earbuds running out of power too quickly. X5 Pro can play music for about 5 hours with ANC enabled or about 7 hours without it. Additionally, the included charging case extends this time to approximately 22 or 31 hours. But that's not all—just 15 minutes of charging the earbuds will give you another hour of listening to your favorite songs!

Additional Features with the App

Get even more out of your earbuds. Simply install the dedicated Edifier Connect app, which offers plenty of interesting features! With it, you can customize touch controls to your preferences and adjust the sound equalizer (EQ) settings—you have 3 presets available, such as classic, pop, and classic rock. You can also switch between noise cancellation and transparent modes.

For Your Comfort

The earbuds are very lightweight and comfortable, so you can listen to your favorite songs for hours without worrying about discomfort or fatigue. They are also dustproof and IP55 moisture resistant—perfect for intense workouts. The package also includes interchangeable ear tips in three sizes (S, M, L), giving you the opportunity to further customize the X5 Pro to your needs.

Included in the Package

- Earbuds
- Charging case
- Interchangeable ear tips (3 pairs - S, M, L)
- Charging cable (USB-A to USB-C)
- User manual
