Smart Plug NEO NAS-WR07W Wi-Fi

Ref: 6924715900995

NEO NAS-WR07W Wi-Fi Smart Socket

Follow modern trends and save on electricity bills. The NEO NAS-WR07W smart socket allows you to manage connected devices from anywhere via the app. It operates on a 2.4GHz Wi-Fi network, with a maximum current of 16 A. Thanks to a series of product usage protections, it is entirely safe to use. Compatibility with popular platforms facilitates operation.

Easy Operation and Configuration

Installing the NEO NAS-WR07W smart socket requires no special equipment or technical knowledge—just 3 simple steps: connect to a 2.4GHz Wi-Fi network, download the dedicated app, and add the device. Plug and Play operation allows for immediate use of the product. This enables you to enjoy remote management of electrical energy in your home without the need for complicated configurations.

Remote Control and Energy Saving

The NEO NAS-WR07W socket enables remote switching on and off of connected devices, providing convenience and potential energy savings. You can set schedules for each device, allowing you to program the turning off of lights or heating when no one is home, thereby reducing unnecessary energy consumption.

Wide Compatibility and Integration

The NEO smart socket works with popular voice assistants and smart home management platforms such as Amazon Alexa, Google Assistant, and Tuya Smart. As a result, you can easily integrate it with other smart home devices and control them using simple voice commands or the app.

Safety of Use

The NEO socket is equipped with an overload reminder system. The device also provides protection against high temperatures. It is made of fire-resistant material, and numerous certificates confirm its high quality.

Compact Design

The socket dimensions are only 65 x 43 x 43 mm, allowing you to discreetly place it in any room, or take it with you on trips to manage electrical devices on the go. Its elegant design perfectly complements modern interiors.
