

## Headlamp Nitecore HC60 V2, 1200lm, USB-C

Headlamp Nitecore HC60 V2, 1200lm, USB-C

NITECORE HC60 V2 head torch

The NITECORE HC60 V2 is a head torch designed with convenience in mind. The high-performance LED will allow you to effectively illuminate the darkness, and the usage of powerful rechargeable battery means you won't have to worry about unexpectedly losing the light you need.

### Lighting quality

The HC60 V2 uses an OSRAM P9 LED, providing up to 1200 lumens of brightness and a range of up to 130 metres. In addition, the 100-degree beam angle perfectly covers your viewing angle, so you won't miss anything in the dark. What's more, the ATR (Advanced Temperature Regulation) system optimises the device's performance by adapting it to the current conditions. This torch is a perfect companion for outdoor activities.

### Powerful battery

The device draws its power from the included lithium-ion battery with a capacity of 3400 mAh. With its help, it can achieve up to 680 hours of operation on a single charge, and when using only ULTRALOW mode, this time can be extended up to 28 days. What's more, you can conveniently charge the battery via the USB-C port, which is further protected from outdoor use.

Ref: 6952506406845

#### User-friendly interface

You can access all the torch functions with just one button. You can set 5 brightness levels and switch between 3 special modes - strobe, locator and SOS. In addition, if you hold the button a little longer, the torch will return to the last used brightness level.

#### Functionality first

The device itself is made of lightweight and durable aluminium alloy. It is mounted in a special rail, allowing 180-degree adjustment of the torch's position. The headband, manufactured from breathable material, is equipped with a silicone strap that prevents sweat from dripping into the eyes. What's more, a rubber pad provides comfort and increases the fit of the headband at the back of the head. All this, together with the non-slip forehead grip, makes using the HC60 V2 very easy and enjoyable.

#### Highly resistant

The HC60 V2 has a reverse polarity protection system, preventing circuit damage, and its IPX7 waterproof rating ensures it will last when exposed to water and dust. It is also resistant to impact from drops of up to 1 metre.

#### The kit includes

- HC60 V2 head torch
- 18650 3400 mAh lithium-ion battery
- Extra O-ring seal
- USB-C cable
- Additional button cover
- Headband
- Rubber grip

#### Specification

##### Producer

NITECORE

##### Model

HC60 V2

##### Brightness

up to 1200 lumens

##### Dimensions

84 x 35.8 x 53.5 mm

##### Weight (without battery)

108.5 g

##### Colour

Black

##### Waterproof

IPX7

##### Power supply

18650 3400 mAh lithium-ion battery

Charging port  
USB-C  
Uptime  
up to 680 hours  
Drop resistance  
up to 1 m
