

Camping lamp Nitecore LR30, 205lm

Camping lamp Nitecore LR30, 205lm

Ref: 6952506402939

Nitecore LR30 camping lamp

The Nitecore LR30 small camping lamp is perfect for camping and other activities. It features 205lm of power and high CRI color rendering index. It can light up white (3 brightness levels) and red (3 modes). It is IPX6 waterproof and impressively durable. Its operating time reaches 62 hours. The device is also very easy to use, lightweight and portable.

Optimal lighting

The lamp is equipped with 6 LEDs, its brightness reaches 205lm and the range is up to 40m. It is distinguished by high color rendering index (CRI≥90). This means that it can provide excellent quality lighting close to natural so as not to tire the eyes. Moreover, the diffuser made of PC plastic and the technology used make the light soft, even and non-flickering.

Red light

LR30 can also glow red. This kind of lighting is great for nighttime use, such as taking photos or observing wildlife. It is also energy efficient, which translates into a long lamp life. Red light is also distinguished by the largest wavelength, making it better suited for use in fog, for example.

Additional capabilities

You can easily adjust the operation of the light to your needs. In case of white light, you can choose from 3 brightness levels - low, mid and high. The red light of the LR30 has 3 modes - steady light, flashing light and SOS light. The device is equipped with a single button, with which you can conveniently operate it.

Worry-free power supply

A single 18650 battery (not included) is enough to power the light, and it will provide up to 62 hours of run time at the lowest brightness level (Low, 12lm). So you don't have to charge it too often, and you won't need to take multiple spare batteries with you. You can also use two CR123 or RCR123 batteries to provide power to the light. The device also has a built-in blue light indicator that indicates battery voltage.

Lightweight and portable

The lamp weighs just 62g (without battery) and is extremely compact. You can easily fit it in your bag or backpack and take it with you to your tent. You can also conveniently place it in the desired location - a special handle allows you to hang it on a hook, and a magnetic base allows you to securely attach it to a metal surface.

Will perform under almost any conditions

The device is made of durable PC plastic, making it extremely solid and resistant to damage. Even a fall from a height of up to 1m will not hurt it. The lamp is also distinguished by IPX6 water resistance, which means that you can use it even in the rain. Water drops or accidental splashing are not a threat to it!

Specification

Brand

Nitecore
