Latarka czołowa Nitecore NU33, 700lm

Ref: 6952506407392

Nitecore NU33 headlamp flashlight, 700lm

Ensure adequate illumination during situations such as night hiking, camping or mountain expeditions. The Nitecore NU33 flashlight is distinguished by its 700 lm brightness and 2 types of light (white and red). What's more, it has a 2,000 mAh rechargeable battery that provides long runtime. It offers adjustable brightness, and with several modes to choose from, you will adapt its operation to your needs. In addition, it is IP66 water resistant and resistant to drops of up to 1m.

3 light sources

The flashlight is equipped with a main white light that offers adjustable brightness at 3 levels: Mid, High and Turbo, and 2 modes of operation: SOS and Beacon, which will make it easier to locate you in the dark. In addition, the Nitecore NU33 has 2 types of auxiliary light: red and white. The former will come in handy when observing wildlife or taking photos. What's more, it allows you to use the following modes: steady light or shutter. The white auxiliary light, on the other hand, provides adjustable brightness - Low (50 lm) and Ultralow (6 lm). It features a high color rendering index CRI ≥ 90 and will work well for reading.

Long working time

Are you worried that the flashlight will suddenly discharge? Don't be! It is equipped with indicators that will inform you about the battery level. This way you will know when it needs to be recharged. It has a lithium-ion battery with a capacity of 2000 mAh, which allows up to

147 h of operation (if you use the lowest brightness level). To renew the device's power, use the included USB-C cable. After about 1.5 h, the flashlight will be ready for further use.

Lightweight and durable

The Nitecore flashlight is distinguished by its lightweight and ergonomic design, which translates into comfort. You can also adjust the strap to suit your needs. It has also been equipped with reflectors, for greater safety of use. What's more, being made of aluminum and PC ensures durability - the flashlight is IP66 water resistant and resistant to drops of up to 1m.

Thoughtful design

The Nitecore NU33 stands out for its carefully thought-out design, so it generates light that is pleasant to the eyes. It provides light with a brightness of up to 700 lm and a range of max. 135 m, and its distribution angle is 100°. On the other hand, 2 buttons are responsible for convenient and simple operation. With their help you can turn on/off the power of the NU33, adjust brightness and change modes. In addition, the product has a Lockout mode, so you can safely store the flashlight and avoid accidental activation.
