

## Flashlight Nitecore TIKI LE, 300lm

Flashlight Nitecore TIKI LE, 300lm

Ref: 6952506405701

### Nitecore TIKI LE 300lm flashlight

The Nitecore TIKI LE flashlight is equipped with 3 types of light: white, red and blue. It will work well in various situations and serve as a warning light. It is lightweight and compact, with a maximum load capacity of 30 kg. The color rendering index is CRI90, so it generates bright and eye-pleasing light. It allows you to adjust the brightness in 4 levels and works up to 40 h on a single charge. In addition, you will find in the set a holder with which you will attach the flashlight to your keys. This way you can always have it with you.

### 3 light sources

Nitecore TIKI LE generates an eye-pleasing white light with a brightness of max. 300 lm. It will find its use while camping or reading. In addition, it provides red and blue light to call for help, indicate your location to others, and works well as a warning light. You can also adjust the brightness of the flashlight at 4 levels: Ultralow, Low, Mid and High.

### Compact and durable

The Nitecore flashlight is distinguished by its lightweight design - its weight is about 10.5 g. What's more, it's compact, so it won't take up much space, successfully clipping it to your keys with the included clasp. What's more, being made of aluminum alloy and fire-resistant PC guarantees durability. In addition, the TIKI LE is IP66 water resistant and resistant to drops of up to 1m.

#### Up to 40 h of operation

The flashlight is equipped with a 130 mAh rechargeable lithium-ion battery, which provides up to 40 h of operation on a single charge (at the lowest brightness level). What's more, the micro USB port facilitates charging (no cable included), and a blue LED indicator will let you know about the charging process. The APC system allows the TIKI LE to remain in standby mode for up to 365 days, and protection against overcharging, over-discharge and short circuit ensures safe use.

#### Easy to use

Using the flashlight will not cause you any problems. It is equipped with a single button, with which you adjust the brightness and select the mode of operation. Press the button 2 times to activate TIKI LE - such a solution will prevent accidental activation of the flashlight, for example, during storage.

#### Included

flashlight  
key clasp  
instruction manual

#### Manufacturer

Nitecore

#### Model

TIKI LE

#### Brightness

300 lm

#### LED
