

ZigBee Human Presence Sensor Sonoff SNZB-06P

ZigBee Human Presence Sensor Sonoff SNZB-06P

Ref: 6920075741858

SONOFF SNZB-06P ZigBee Human Presence Sensor

The SONOFF SNZB-06P is an advanced sensor designed to detect human presence and optimize lighting and energy management in our homes. Utilizing a 5.8 GHz microwave radar, this intelligent sensor not only detects motion but even stationary individuals, automatically turning on lights and keeping them on for your convenience. Its unique ability to operate without the need for the Internet, versatile compatibility with platforms, and energy-saving features make it an essential component of any smart home.

Micro-Microwave Radar-Based Presence Detection

The SONOFF SNZB-06P, equipped with a 5.8 GHz microwave radar, can detect even the slightest movement, including breathing and heartbeats. This advanced technology ensures that lights are activated only when needed, leading to significant energy savings.

Energy-Efficient Light Sensor

The built-in light sensor ensures that lighting is only turned on in dark environments. This is not only convenient but also helps greatly reduce energy consumption.

Zigbee 3.0 Compatibility

The sensor is fully compatible with Zigbee 3.0 hubs, allowing seamless integration with various home automation systems, including

popular models like SONOFF and Echo Plus 2nd, providing easy and efficient control over home lighting.

Local Smart Scene Support

The unique local smart scene feature enables the creation and management of scenes between Zigbee devices, even without Internet access. This ensures the reliability and continuity of the system's operation, regardless of network availability.

Support for Multiple Platforms

The SNZB-06P supports multiple platforms, including Alexa, Google Home, Smartthings, Alice, IFTTT, and Home Assistant. This versatility allows for flexible integration with various ecosystems and platforms, giving users the freedom to choose and customize according to their individual preferences.
