

Indoor 360° Wi-Fi IP camera Gosund IPC2 3MP

Indoor 360° Wi-Fi IP camera Gosund IPC2 3MP

Ref: 6972391287701

Gosund IPC2 3MP rotating indoor Wi-Fi camera

Boost the level of security in your home. The Gosund IPC2 indoor camera provides high quality images both day and night, and can also rotate horizontally and vertically. This ensures that you have every nook and cranny under control! The device also detects motion and sound - if something happens, you'll get an instant notification on your phone. The product is also compatible with the Tuya ecosystem, as well as with Google Assistant and Amazon Alexa voice assistants.

Facilitated communication

The camera is equipped with a speaker and a microphone, allowing 2-way audio transmission. With its help, you can, for example, deliver a message to the rest of the household at any time, greet guests who have come for an unannounced visit or tell the courier where he should leave a package.

Keep your hand on the pulse

Have confidence that your home is safe and secure. The camera has a built-in motion sensor - if someone comes within its range, you'll immediately get a notification on your phone. The device can also detect sounds, such as a baby crying, for example - you'll be instantly informed of such situations as well. This will give you time to react accordingly!

High image quality

With Gosund IPC2 you will not miss any detail. The camera offers a resolution of 2560x1440 and supports WDR technology, so it can provide clear, detail-saturated images and vivid, natural colors. The device is also equipped with 4 850 nm infrared light beads, which enable high quality video even at night.

Additional capabilities

The camera allows you to store saved videos in 2 ways - on a TF card with a capacity of up to 256 GB or in the cloud. It is also compatible with the Tuya Smart app and with voice assistants such as Amazon Alexa and Google Assistant. This makes its operation even more convenient! There's also a special privacy mode - for example, you can turn it on when you're at home and don't want the device to record you.
