HomeRunPet Pet Blow Dryer PD10

Ref: 6970834412567

HomeRunPet PD10 pet hair dryer.

In the world of pet grooming accessories, the HomeRunPet PD10 pet hair dryer stands out thanks to its innovation and focus on comfort for both pet and owner. The PD10 is the result of a combination of advanced technology with the delicate skin of our pets in mind. See what it can offer you!

Quiet and efficient operation - the secret to perfect grooming

With an impressive motor speed of 31,000 RPM and a nozzle width of 10 cm, the PD10 provides not only fast, but also effective drying for any type of hair. Whether you're dealing with short, medium-length or long hair, drying time is significantly reduced to 8-45 minutes depending on the length of the fur. What sets the PD10 apart is its remarkable quiet operation. It uses innovative technology to reduce noise by curving the airflow path, making the volume of the dryer only 53 dB. This is a level that does not stress the animals, allowing them to enjoy the moment.

Technology for health and convenience

The HomeRunPet PD10 is no ordinary dryer. It comes with an "elbow" nozzle that emits 20 million negative ions, which not only speeds up the drying process, but also improves the quality of the coat, giving it a healthy shine. In addition, the dryer offers 99 wind speeds at a stable temperature, allowing you to fine-tune it to your pet's needs.

Thoughtful design

Color-coded temperature indicators (red for hot air, yellow for warm air, and gray for room temperature) ensure intuitive use of the device, eliminating the risk of overheating. The double-layered handle guarantees heat insulation and ease of use, while the 20° downward airflow direction further enhances comfort.

Safety first

With long-term and safe use in mind, the PD10 is equipped with dual filters to protect the motor from dirt and debris. This, combined with overheat resistance, makes each drying session not only effective, but also safe for the device and your pet.
