### Smart WiFi Mini Dogness Pet Feeder (White)

In the era of modern technology, even taking care of our four-legged friends becomes easier and more efficient. The Smart WiFi Mini Dogness Pet Feeder is an example of a device that combines advanced technology with care for the needs of our pets. Its compact design, remote control capability through the app, and a range of features ensuring feeding safety and hygiene make it an indispensable assistant in any household with a dog. With Dogness, you can be sure that your pet is fed regularly, healthily, and safely even when you're not around.

### Remote Control and Monitoring

With WiFi connectivity and a dedicated app, the Dogness Smart Pet Feeder allows you to control your pet's feeding process from anywhere. You can set feeding schedules, adjust portion sizes, and monitor the amount of food in the container. The app also notifies you of low food levels, ensuring you always know when it's time to replenish. It's convenience and peace of mind for every pet owner.

### Hygienic Stainless Steel Bowl

A food bowl made of food-grade stainless steel guarantees the hygiene and health safety of your pet. It's easy to disassemble and clean, preventing bacteria growth and protecting against urinary tract infections in pets. This is an important aspect for owners who care about the health of their pets.

#### Clog Prevention System

A unique patent utilizing a rotor to prevent device clogging ensures the reliability and continuity of the feeding process. With this solution, you can rest assured that your pet's feeding won't be unexpectedly interrupted, and feeding will proceed smoothly and efficiently.

#### Dual Power Protection

With unforeseen situations in mind, such as power outages, the Dogness Smart Pet Feeder is equipped with a dual power system. It supports both USB and battery power, ensuring continuous feeding even in challenging conditions. It's an additional layer of security so you don't have to worry about your pet going hungry.

#### Compact Design and Capacity

The feeder's compact dimensions (346 x 188 x 259mm) allow it to fit in any corner of the house without taking up much space. Despite its small size, its 2L capacity container can hold up to 1kg of food, ensuring efficient and long-lasting feeding without the need for constant replenishment.
